

Historical Atlas of Chile

Codebook · Version 2.0

Maximiliano Vejares · Johns Hopkins University · July 14, 2026

This codebook documents the 287 published indicators of the Historical Atlas of Chile, the browse-visible catalog served at the atlas website and carried in the downloadable dataset. Indicators are organized into 21 thematic categories and drawn from a catalog of 149 indicator families, groups of related variables that measure the same concept across geographic levels, time periods, or disaggregations. For each indicator the codebook reports the identifier, display name, a curated definition, the unit of measurement, the geographic scales covered, year coverage and observation counts at each scale, and the primary sources.

The companion methodology document describes the extraction pipeline, the tiered audit protocol, the geographic schema, and known limitations in detail.

Dataset summary: 110,572 observations · 149 indicator families · 287 published indicators · 108 primary sources · 4 geographic levels · 1810-1992

About the Database

The Historical Atlas of Chile is a public data platform of Chilean historical statistics at the national, province, department, and comuna level, 1810 to 1992. It is built for scholars across all fields, journalists, and civil society, on the model of Our World in Data and the World Bank's World Development Indicators. The data are extracted to research grade from the records of the Chilean state and private institutions: population censuses, the Anuarios Estadísticos, ministerial Memorias, the Sinopsis Estadística, tax rolls, and curated scholarly compilations such as Mamalakís. Every observation is stored at the finest administrative level its source reports; coarser levels are derived roll-ups, never the stored unit. After the 1891 Ley de Comuna Autónoma the comuna is the base administrative unit; before 1891 the department is the finest unit the sources report.

Each published indicator carries a curated definition, a unit, its geographic scales, a coverage statement, and full source citations. An indicator reaches the catalog only when it has real coverage at its level and its extraction has passed the audit protocol; retired series, alternate source variants, and series with unresolved data-integrity issues are withheld from the catalog and from this codebook.

The Canonical Schema

The downloadable dataset is a long-format table in which every row is one observation: one variable, for one geographic unit, in one year, from one source. The 14 columns are:

Column	Description
year	Year of the observation (1810 to 1992).
geographic_unit	Name of the comuna, department, province, or country.
geographic_level	One of commune, department, province, national, city, macro_region.
dcode	Department linking key (52-department longitudinal panel, 19th century).
pcode	Province linking key (26-province panel).
ccode	Comuna linking key (5-digit código único territorial).
variable	Variable name; maps to one indicator family.
value	Numeric value.
source_document	Source document citation.
source_page	Page number in the source.
source_table	Table identifier in the source.
source_sheet	Sheet name, for spreadsheet sources.
notes	Structured metadata prefixes and free-form notes.
quality_flag	Audit verdict for the cell (vocabulary below).

Quality Flags

Every cell carries one of seven audit verdicts in the `quality_flag` column. Only the first five promote to the published dataset; the last two remain in staging until hand-audited.

Flag	Meaning
observed	Real measurement; value present and audit passed.
observed_zero	Value is zero and zeros are meaningful for this indicator family.

not_collected	The source covers this year and unit but prints no value; informative null.
estimated	The source flags the value as an estimate (for example, intercensal projections).
reconstructed	Interpolated or reconstructed by a scholarly compilation, not directly observed.
needs_review	Automated rules cannot decide, or a consistency check failed; held in staging.
failed_extraction	The source covers this cell but extraction failed; held in staging.

Source Hierarchy and Canonical Values

Each combination of geographic unit, geographic level, year, and indicator resolves to exactly one published value. When multiple sources report the same cell, the canonical value is selected by the hierarchy **Census > Anuario > Memoria > Sinopsis**, then by audit quality. Non-canonical readings are retained in a triangulation register for cross-checking; they never appear on the website or in the download. Documented breaks (boundary changes, currency reforms) are annotated on the affected series.

Summary by Category

Category	Indicators	Observations
Economy	55	5,646
Demographics	41	3,544
Education	25	1,546
Agriculture	20	2,071
Vital statistics	20	2,490
Housing	18	6,030
Population & Labor	15	3,147
Politics	13	977
Public finance	11	1,229
Infrastructure	9	1,294
Land Structure	9	398
Occupations	9	3,129
Public health	9	497
Justice	7	149
Electoral	6	1,664
Mining	6	609
Sectoral Employment	6	922
Governance	3	841
Industry	2	241
State capacity	2	403
Agrarian structure	1	210
Total	287	37,037

Observation counts are summed across the geographic scales at which each indicator is published, so a series available at both province and department level counts each scale's observations.

Economy

Provincial total expenditure

ID: totexp · Unit: pesos

Coverage: Province: 1845-1890 (41 years, 635 obs.)

Total provincial-government expenditure in pesos, 1845-1890, from the Véjares department-level historical dataset.

Captures the 19th-century provincial fiscal apparatus that the post-1925 centralization gradually absorbed.

Sources: Véjares, Maximiliano. Forthcoming. Department-level historical dataset, Chile, 19th century. Compiled from primary archival sources. Net Zero Industrial Policy Lab, Johns Hopkins University.

Municipal revenue

ID: muni_total_revenue · Unit: pesos

Coverage: Department: 1875-1907 (4 years, 184 obs.)

Total municipal revenue (locally raised plus central-government subsidy), department scale, Sinopsis Estadística de Chile 1875/1895/1907 municipal finance sections. The denominator for the muni_subsidy_share and muni_police_share indicators.

Sources: Oficina Central de Estadística. 1907. Sinopsis Estadística de la República de Chile, año 1907, municipal finance section. Santiago: Imprenta Nacional.; Oficina Central de Estadística. 1875. Sinopsis Estadística de la República de Chile, año 1875, municipal finance section. Santiago: Imprenta Nacional.; Oficina Central de Estadística. 1895. Sinopsis Estadística de la República de Chile, año 1895, municipal finance section. Santiago: Imprenta Nacional.; Oficina Central de Estadística. 1886. Anuario Estadístico de la República de Chile, año 1885, municipal finance section. Santiago: Imprenta Nacional.

Consumer price index (1995 = 100)

ID: cpi_index · Unit: index, 1995 = 100

Coverage: National: 1810-1990 (181 years, 181 obs.)

Consumer price index for Chile, rebased to 1995 = 100.

Sources: Dirección General de Estadística e Instituto Nacional de Estadísticas, Índice de Precios al Consumidor, 1928 onward (figures before 1928 are historical reconstructions).

Exports

ID: exports_millions_1995_pesos · Unit: millions of 1995 pesos

Coverage: National: 1810-1990 (181 years, 181 obs.)

Total exports valued in millions of 1995 pesos. The constant-1995-peso deflator handles the currency reforms; this is the primary long-run measure of Chilean export performance.

Unit note: millions 1995 pesos

Sources: Superintendencia de Aduanas y Oficina Central de Estadística, Estadística Comercial de la República de Chile, and Banco Central de Chile, Comercio Exterior, various years.

Exports in current dollars

ID: exports_in_current_dollars · Unit: current US dollars

Coverage: National: 1810-1990 (181 years, 181 obs.)

Total exports valued in current US dollars. Useful for cross-country comparison but not for real growth, which requires deflation.

Sources: Superintendencia de Aduanas y Oficina Central de Estadística, Estadística Comercial de la República de Chile, and Banco Central de Chile, Comercio Exterior, various years.

Fiscal Expenditure (millions)

ID: `fiscal_expenditure_millions` · Unit: millions of pesos

Coverage: National: 1810-1990 (181 years, 181 obs.)

Total central-government fiscal expenditure in millions of pesos. The nominal-peso caveats from `fiscal_revenue_millions` apply.

Sources: *Memoria del Ministerio de Hacienda and Dirección de Presupuestos y Contraloría General de la República, Cuenta de la Inversión / Cálculo de Entradas y Gastos, various years.*

Fiscal Revenue (millions)

ID: `fiscal_revenue_millions` · Unit: millions of pesos

Coverage: National: 1810-1990 (181 years, 181 obs.)

Total central-government fiscal revenue in millions of pesos. The nominal-peso unit crosses the 1925 (Central Bank founding), 1960 (escudo), and 1975 (new peso) currency reforms without rescaling at the cell level; the break-annotation register documents these. For deflated comparison, see `fiscal_revenue_pesos` at a narrower window or use the GDP-share series.

Sources: *Memoria del Ministerio de Hacienda and Dirección de Presupuestos y Contraloría General de la República, Cuenta de la Inversión / Cálculo de Entradas y Gastos, various years.*

Fiscal surplus (real pesos)

ID: `fiscal_surplus_real_pesos` · Unit: real pesos

Coverage: National: 1810-1990 (181 years, 181 obs.)

Central-government fiscal surplus expressed in real (deflated) pesos. The deflator and base year for the 'real pesos' construction are not standardized across the full 1810-1990 window; the convention shifts across publication periods, and the 1973-1976 inflation-index dispute documented in the break-annotation register affects the deflator for that window.

Note: deflator convention drifts across the period.

Sources: *Memoria del Ministerio de Hacienda and Dirección de Presupuestos y Contraloría General de la República, Cuenta de la Inversión / Cálculo de Entradas y Gastos, various years.*

Government expenditure per capita

ID: `expenditure_per_capita_real` · Unit: pesos (1995)

Coverage: National: 1810-1990 (181 years, 181 obs.)

Central-government expenditure per capita in constant 1995 pesos.

Sources: *Memoria del Ministerio de Hacienda and Dirección de Presupuestos y Contraloría General de la República, Cuenta de la Inversión / Cálculo de Entradas y Gastos, various years.*

Import capacity

ID: `import_capacity` · Unit: %

Coverage: National: 1810-1990 (181 years, 181 obs.)

Real value of exports adjusted by terms of trade, expressed as an index. The series measures the volume of imports Chile could buy with its export earnings, which captures terms-of-trade effects that simple export-volume series miss.

Sources: *Superintendencia de Aduanas y Oficina Central de Estadística, Estadística Comercial de la República de Chile, and Banco Central de Chile, Comercio Exterior, various years.*

Imports

ID: `imports_millions_1995_pesos` · Unit: millions of 1995 pesos

Coverage: National: 1810-1990 (181 years, 181 obs.)

Total imports valued in millions of 1995 pesos.

Unit note: millions 1995 pesos

Sources: *Superintendencia de Aduanas y Oficina Central de Estadística, Estadística Comercial de la República de Chile, and Banco Central de Chile, Comercio Exterior, various years.*

Imports in current dollars

ID: `imports_in_current_dollars` · Unit: current US dollars

Coverage: National: 1810-1990 (181 years, 181 obs.)

Total imports valued in current US dollars.

Sources: *Superintendencia de Aduanas y Oficina Central de Estadística, Estadística Comercial de la República de Chile, and Banco Central de Chile, Comercio Exterior, various years.*

Trade balance (current dollars)

ID: `trade_balance_current` · Unit: current US dollars

Coverage: National: 1810-1990 (181 years, 181 obs.)

Merchandise trade balance, exports minus imports, both valued in current US dollars. Computed by this project as `exports_in_current_dollars` minus `imports_in_current_dollars`; a positive value is a trade surplus. Both inputs are primary customs and trade statistics, so the balance carries no secondary-compilation lineage. Current-dollar values are not deflated and are unsuitable for real-growth comparison.

Sources: *Superintendencia de Aduanas y Oficina Central de Estadística, Estadística Comercial de la República de Chile, and Banco Central de Chile, Comercio Exterior, various years.*

External public debt

ID: `external_public_debt` · Unit: millions of pesos

Coverage: National: 1822-1990 (169 years, 169 obs.)

Outstanding stock of external public debt in millions of pesos. The nominal-peso unit makes this series uninterpretable across the 1925, 1960, and 1975 currency reforms without deflation; the break-annotation register flags these.

Sources: *Memoria del Ministerio de Hacienda and Dirección de Presupuestos y Contraloría General de la República, Cuenta de la Inversión / Cálculo de Entradas y Gastos, various years.*

Average import tariff rate

ID: `tariff_imports_avg` · Unit: %

Coverage: National: 1833-1990 (157 years, 157 obs.)

Average ad valorem tariff applied to imports.

Sources: *Memoria del Ministerio de Hacienda and Dirección de Presupuestos y Contraloría General de la República, Cuenta de la Inversión / Cálculo de Entradas y Gastos, various years.*

Agricultural exports

ID: `agricultural_exports` · Unit: millions of US dollars

Coverage: National: 1844-1990 (147 years, 147 obs.)

Value of agricultural exports (crops, livestock products, wood, fish). Chile's agricultural exports peaked in absolute and relative terms during the 1850s-1880s wheat-export cycle and then declined relative to mining exports.

Unit note: Unit field currently blank; verify whether series is in millions of 1995 pesos, current dollars, or millions of pesos current.

Note: unit not fully documented in the source.

Sources: *Superintendencia de Aduanas y Oficina Central de Estadística, Estadística Comercial de la República de Chile, and Banco Central de Chile, Comercio Exterior, various years.*

Agricultural exports share

ID: `agricultural_exports_share` · Unit: %

Coverage: National: 1844-1990 (147 years, 147 obs.)

Agricultural exports as a percentage of total exports by value.

Sources: Superintendencia de Aduanas y Oficina Central de Estadística, Estadística Comercial de la República de Chile, and Banco Central de Chile, Comercio Exterior, various years.

Manufacturing exports

ID: `manufacturing_exports` · Unit: millions of US dollars

Coverage: National: 1844-1990 (147 years, 147 obs.)

Value of manufactured exports. The manufacturing-export share was negligible through most of Chilean history and only rose modestly after the 1985 export-diversification push.

Unit note: Unit field currently blank.

Note: unit not fully documented in the source.

Sources: Superintendencia de Aduanas y Oficina Central de Estadística, Estadística Comercial de la República de Chile, and Banco Central de Chile, Comercio Exterior, various years.

Manufacturing exports share

ID: `manufacturing_exports_share` · Unit: %

Coverage: National: 1844-1990 (147 years, 147 obs.)

Manufacturing exports as a percentage of total exports.

Sources: Superintendencia de Aduanas y Oficina Central de Estadística, Estadística Comercial de la República de Chile, and Banco Central de Chile, Comercio Exterior, various years.

Mining exports

ID: `mining_exports` · Unit: millions of US dollars

Coverage: National: 1844-1990 (147 years, 147 obs.)

Value of mining exports (copper, saltpeter, silver, gold, coal, iron, other minerals). The dominant Chilean export category from roughly 1880 forward.

Unit note: Unit field currently blank.

Note: unit not fully documented in the source.

Sources: Superintendencia de Aduanas y Oficina Central de Estadística, Estadística Comercial de la República de Chile, and Banco Central de Chile, Comercio Exterior, various years.

Mining exports share

ID: `mining_exports_share` · Unit: %

Coverage: National: 1844-1990 (147 years, 147 obs.)

Mining exports as a percentage of total exports. The series shows the rise of nitrate (peaking ca. 1929 at over 70% of exports), the post-1929 transition to copper, and the 20th-century persistence of copper dominance.

Sources: Superintendencia de Aduanas y Oficina Central de Estadística, Estadística Comercial de la República de Chile, and Banco Central de Chile, Comercio Exterior, various years.

Municipal local revenue

ID: muni_entradas_locales · Unit: pesos

Coverage: Department: 1875-1907 (3 years, 126 obs.)

Municipal revenue raised locally (excluding central-government subsidy), department scale, Sinopsis Estadística de Chile 1875/1895/1907 municipal finance sections. Local revenue came from property taxes (contribuciones), license fees (patentes), and miscellaneous service fees; the composition varied by department.

Sources: Oficina Central de Estadística. 1907. Sinopsis Estadística de la República de Chile, año 1907, municipal finance section. Santiago: Imprenta Nacional.; Oficina Central de Estadística. 1875. Sinopsis Estadística de la República de Chile, año 1875, municipal finance section. Santiago: Imprenta Nacional.; Oficina Central de Estadística. 1895. Sinopsis Estadística de la República de Chile, año 1895, municipal finance section. Santiago: Imprenta Nacional.

Provincial GDP share

ID: pct_pgb_provincial · Unit: %

Coverage: Province: 1966-1970 (5 years, 125 obs.)

Each province's share of national GDP, 1966-1970, source attribution incomplete in the manifest.

Pre-CONARA-regionalization provinces; the 1974 regional reorganization (see break-annotation register) renders this geography historical.

Note: source attribution incomplete.

Sources: Mamalakis, Markos. 1980. Historical Statistics of Chile, Volume 2: Demography and Labor Force. Westport, CT: Greenwood Press.

Municipal central subsidy

ID: muni_subvencion_gobierno · Unit: current pesos

Coverage: Department: 1875-1895 (3 years, 107 obs.)

Annual subsidy from the central government to a department's municipal treasury, Sinopsis Estadística de Chile 1875-1895 municipal finance section. The subsidy was a substantial fraction of municipal budgets in poorer departments and a much smaller fraction in revenue-rich departments; the series documents the geography of central-government redistribution.

Unit note: Unit field currently blank; should read 'pesos' (1851 decimal peso, pre-1925 reform).

Sources: Oficina Central de Estadística. 1875. Sinopsis Estadística de la República de Chile, año 1875, municipal finance section. Santiago: Imprenta Nacional.; Oficina Central de Estadística. 1886. Anuario Estadístico de la República de Chile, año 1885, municipal finance section. Santiago: Imprenta Nacional.; Oficina Central de Estadística. 1895. Sinopsis Estadística de la República de Chile, año 1895, municipal finance section. Santiago: Imprenta Nacional.

Subsidy share of revenue

ID: muni_subsidy_share · Unit: %

Coverage: Department: 1875-1895 (3 years, 107 obs.)

Central-government subsidy as a percentage of total municipal revenue at department scale, Sinopsis Estadística 1875-1895 municipal finance sections. Measures the dependence of municipal finance on central-government transfers; higher in frontier and resource-poor departments, lower in Santiago and Valparaíso.

Sources: Oficina Central de Estadística. 1875. Sinopsis Estadística de la República de Chile, año 1875, municipal finance section. Santiago: Imprenta Nacional.; Oficina Central de Estadística. 1886. Anuario Estadístico de la República de Chile, año 1885, municipal finance section. Santiago: Imprenta Nacional.; Oficina Central de Estadística. 1895. Sinopsis Estadística de la República de Chile, año 1895, municipal finance section. Santiago: Imprenta Nacional.

Capital goods imports

ID: `capital_goods_imports` · Unit: millions of US dollars

Coverage: National: 1844-1937 (94 years, 94 obs.)

Value of capital-goods imports (machinery, transportation equipment, construction materials). The series ends in 1937; later capital-goods imports are tracked under different indicators that follow the 1929 customs-classification revision.

Unit note: millions of US dollars

Note: unit not fully documented in the source.

Sources: *Superintendencia de Aduanas y Oficina Central de Estadística, Estadística Comercial de la República de Chile, and Banco Central de Chile, Comercio Exterior, various years.*

Consumer goods imports

ID: `consumer_goods_imports` · Unit: millions of US dollars

Coverage: National: 1844-1937 (94 years, 94 obs.)

Value of consumer-goods imports. The series ends in 1937; same caveat as `capital_goods_imports`.

Unit note: millions of US dollars

Note: unit not fully documented in the source.

Sources: *Superintendencia de Aduanas y Oficina Central de Estadística, Estadística Comercial de la República de Chile, and Banco Central de Chile, Comercio Exterior, various years.*

Intermediate goods imports

ID: `intermediate_goods_imports` · Unit: millions of US dollars

Coverage: National: 1844-1937 (94 years, 94 obs.)

Value of intermediate-goods imports (industrial inputs, semi-finished products). Series ends in 1937.

Unit note: millions of US dollars

Note: unit not fully documented in the source.

Sources: *Superintendencia de Aduanas y Oficina Central de Estadística, Estadística Comercial de la República de Chile, and Banco Central de Chile, Comercio Exterior, various years.*

Municipal police (ornato)

ID: `muni_policia_ornato` · Unit: current pesos

Coverage: Department: 1875-1895 (2 years, 90 obs.)

Municipal outlays on *policía de ornato*, the 19th-century Chilean term for municipal services covering public works, lighting, cleanliness, and building regulation, at department scale. From the *Sinopsis Estadística municipal finance* sections. The complement to `muni_policia_seguridad` (public order police).

Unit note: Unit field currently blank; should read 'pesos'.

Sources: *Oficina Central de Estadística. 1895. Sinopsis Estadística de la República de Chile, año 1895, municipal finance section. Santiago: Imprenta Nacional.; Oficina Central de Estadística. 1875. Sinopsis Estadística de la República de Chile, año 1875, municipal finance section. Santiago: Imprenta Nacional.*

Municipal police (seguridad)

ID: `muni_policia_seguridad` · Unit: current pesos

Coverage: Department: 1875-1895 (2 years, 88 obs.)

Municipal outlays on *policía de seguridad*, the 19th-century Chilean term for the municipal public-order police force, at department scale. From the *Sinopsis Estadística municipal finance* sections. The Chilean state developed a separate gendarmerie (*Cuerpo de Gendarmes*, later *Carabineros* from 1927) that gradually absorbed municipal *seguridad* functions; this series captures the pre-*Carabineros* municipal era.

Unit note: Unit field currently blank; should read 'pesos'.

Sources: *Oficina Central de Estadística. 1895. Sinopsis Estadística de la República de Chile, año 1895, municipal finance section. Santiago: Imprenta Nacional.; Oficina Central de Estadística. 1875. Sinopsis Estadística de la República de Chile, año 1875, municipal finance section. Santiago: Imprenta Nacional.*

Police share of revenue

ID: muni_police_share · Unit: %

Coverage: Department: 1875-1895 (2 years, 73 obs.)

Combined municipal police expenditure (policía de ornato plus policía de seguridad) as a percentage of total municipal revenue, department scale. A useful summary of municipal state-capacity allocation in the late 19th century.

Sources: Oficina Central de Estadística. 1875. Sinopsis Estadística de la República de Chile, año 1875, municipal finance section. Santiago: Imprenta Nacional.; Oficina Central de Estadística. 1895. Sinopsis Estadística de la República de Chile, año 1895, municipal finance section. Santiago: Imprenta Nacional.

Internal public debt

ID: internal_public_debt · Unit: millions of pesos

Coverage: National: 1840-1897 (58 years, 58 obs.)

Outstanding stock of domestic public debt in millions of pesos during the 19th century, source attribution incomplete in the manifest. The series ends in 1897; the post-1897 internal debt is captured under other indicators or remains to be added.

Note: source attribution incomplete.

Sources: Memoria del Ministerio de Hacienda and Dirección de Presupuestos y Contraloría General de la República, Cuenta de la Inversión / Cálculo de Entradas y Gastos, various years.

Peso exchange rate

ID: peso_exchange_rate · Unit: pesos per US dollar

Coverage: National: 1840-1897 (58 years, 58 obs.)

Nominal exchange rate of the Chilean peso against the US dollar, 1840-1897. The series captures the late-19th-century peso depreciation that culminated in Chile's 1898 abandonment of convertibility; source attribution is incomplete in the manifest and should be reconstructed from Mamalakis or the Memoria de Hacienda series.

Note: source attribution incomplete.

Sources: Memoria del Ministerio de Hacienda and Dirección de Presupuestos y Contraloría General de la República, Cuenta de la Inversión / Cálculo de Entradas y Gastos, various years.

Total exports

ID: exports_total_nat · Unit: pesos (18d)

Coverage: National: 1862-1924 (58 years, 58 obs.)

Total value of Chilean exports, 1862-1924, in pesos of 18 pence, from the foreign-trade series.

Sources: Dirección General de Estadística. 1927. Sinopsis Estadística de Chile, 1924-1927. Santiago.

Nitrate (salitre) production (metric tons)

ID: salitre_production_tons · Unit: count

Coverage: National: 1880-1927 (48 years, 48 obs.)

Annual national production of nitrate (salitre) in metric tons, 1880-1927, from the retrospective series of the Sinopsis Estadística de Chile 1900 and 1924-27. Nitrate was the export backbone of the post-War of the Pacific economy and the base of the export tax that dominated fiscal revenue until the synthetic-nitrate collapse.

Sources: Dirección General de Estadística. 1927. Sinopsis Estadística de Chile, 1924-1927. Santiago.; Sinopsis Estadística - Chile 1900

Total foreign trade

ID: total_trade_nat · Unit: pesos

Coverage: National: 1870-1914 (42 years, 42 obs.)

Total value of Chilean foreign trade (imports plus exports), 1870-1914, from the trade series.

Sources: Aldana, Abelardo. 1914. Resumen de la Hacienda Pública de Chile, 1833-1914. Santiago: Imprenta Universitaria.

Mint receipts

ID: `mint_receipts_national` · Unit: pesos

Coverage: National: 1837-1894 (40 years, 40 obs.)

Receipts of the national mint (Casa de Moneda).

Sources: Aldana, Abelardo. 1914. *Resumen de la Hacienda Pública de Chile, 1833-1914*. Santiago: Imprenta Universitaria.

Shipping tonnage entered

ID: `shipping_tonnage_entered` · Unit: tons

Coverage: National: 1874-1914 (38 years, 38 obs.)

Total registered tonnage of vessels entering Chilean ports.

Sources: Véjares, Maximiliano. Forthcoming. *Compiled fiscal and customs series, Chile, 19th century*. Net Zero Industrial Policy Lab, Johns Hopkins University.

Economically active population (1952)

ID: `poblacion_activa_1952` · Unit: count

Coverage: Province: 1952 (1 year, 25 obs.)

Economically active population at the 1952 census, by province, from Censo 1952, Tomo 1 (Resumen del País), Servicio Nacional de Estadística y Censos: persons who declared an occupation or were seeking work, under the census definition of the labor force. A single-year cross-section.

Sources: Censo 1952 Tomo 1 - Resumen del País (Servicio Nacional de Estadística y Censos)

Customs revenue (British Foreign Office returns)

ID: `customs_revenue_nat` · Unit: GBP

Coverage: National: 1837-1860 (24 years, 24 obs.)

Customs revenue of the Chilean state, 1840-1860, from the statistical returns of the British Foreign Office. Customs duties were the dominant ordinary revenue of the 19th-century state.

Sources: Aldana, Abelardo. 1914. *Resumen de la Hacienda Pública de Chile, 1833-1914*. Santiago: Imprenta Universitaria.

Mining production value, pesos (1914)

ID: `valor_minero_total_1914` · Unit: pesos

Coverage: Province: 1914 (1 year, 19 obs.)

Total declared value of mining and metallurgical production by province in 1914, in nominal pesos, from the Anuario Estadístico de Chile 1914, Vol. VII (Minería y Metalurgia). A single-year cross-section dominated by the nitrate provinces of the north.

Sources: Anuario Estadístico de la Republica de Chile, Año 1914, Vol. VII Minería y Metalurgia

Customs (external) taxes, share of revenue

ID: `external_taxes_share_of_revenue` · Unit: %

Coverage: National: 1846-1888 (17 years, 17 obs.)

Customs (external trade) duties as a percentage of total ordinary fiscal revenue. Computed by this project as `revenue_customs_pesos` divided by `revenue_total_ordinary_pesos`, times 100. Both inputs are PRIMARY per-ramo revenue levels in nominal pesos, transcribed from the Memorias de Hacienda and the Anuario Estadístico fiscal cuadros and reconciled to each source's printed total; the share therefore carries no secondary-compilation lineage. Coverage follows the extracted level years.

Sources: Memoria del Ministerio de Hacienda 1861, 1870, 1876, 1880, and 1889 (cuadros comparativos de las entradas ordinarias), and Oficina Central de Estadística, Anuario Estadístico de la Republica de Chile 1860 (entradas fiscales por ramos, 1846-1852). Santiago: Imprenta Nacional. Per-ramo levels transcribed and reconciled to each cuadro's printed total.

Customs revenue (nominal pesos)

ID: revenue_customs_pesos · Unit: pesos

Coverage: National: 1846-1888 (17 years, 17 obs.)

Ordinary fiscal revenue collected by the customs houses (aduanas), in nominal pesos, 1846-1888. The dominant single source of state revenue throughout the period. Compiled from the ramo-level receipts printed in the Anuario Estadístico de Chile 1860 and the Memorias del Ministerio de Hacienda; category totals are sums of the primary ramos as printed, with each cell citing its source volume.

Unit note: Nominal pesos of the day; no deflation applied across the series.

Sources: Memoria del Ministerio de Hacienda 1861, 1870, 1876, 1880, and 1889 (cuadros comparativos de las entradas ordinarias), and Oficina Central de Estadística, Anuario Estadístico de la Republica de Chile 1860 (entradas fiscales por ramos, 1846-1852). Santiago: Imprenta Nacional. Per-ramo levels transcribed and reconciled to each cuadro's printed total.

Direct tax revenue (nominal pesos)

ID: revenue_direct_taxes_pesos · Unit: pesos

Coverage: National: 1846-1888 (17 years, 17 obs.)

Ordinary fiscal revenue from direct contributions, chiefly the agricultural land tax (catastro) and related levies on property and income, in nominal pesos, 1846-1888. Compiled from the ramo-level receipts printed in the Anuario Estadístico de Chile 1860 and the Memorias del Ministerio de Hacienda; category totals are sums of the primary ramos as printed, with each cell citing its source volume.

Unit note: Nominal pesos of the day; no deflation applied across the series.

Sources: Memoria del Ministerio de Hacienda 1861, 1870, 1876, 1880, and 1889 (cuadros comparativos de las entradas ordinarias), and Oficina Central de Estadística, Anuario Estadístico de la Republica de Chile 1860 (entradas fiscales por ramos, 1846-1852). Santiago: Imprenta Nacional. Per-ramo levels transcribed and reconciled to each cuadro's printed total.

Direct taxes, share of revenue

ID: direct_taxes_share_of_revenue · Unit: %

Coverage: National: 1846-1888 (17 years, 17 obs.)

Direct taxes (territorial, income, inheritance) as a percentage of total ordinary fiscal revenue. Computed by this project as revenue_direct_taxes_pesos divided by revenue_total_ordinary_pesos, times 100. Both inputs are PRIMARY per-ramo revenue levels in nominal pesos, transcribed from the Memorias de Hacienda and the Anuario Estadístico fiscal cuadros and reconciled to each source's printed total; the share therefore carries no secondary-compilation lineage. Coverage follows the extracted level years.

Sources: Memoria del Ministerio de Hacienda 1861, 1870, 1876, 1880, and 1889 (cuadros comparativos de las entradas ordinarias), and Oficina Central de Estadística, Anuario Estadístico de la Republica de Chile 1860 (entradas fiscales por ramos, 1846-1852). Santiago: Imprenta Nacional. Per-ramo levels transcribed and reconciled to each cuadro's printed total.

Indirect / internal tax revenue (nominal pesos)

ID: revenue_indirect_taxes_pesos · Unit: pesos

Coverage: National: 1846-1888 (17 years, 17 obs.)

Ordinary fiscal revenue from internal indirect taxation, including the alcabala transfer tax, stamped paper, and commercial patentes (assigned to this category by convention), in nominal pesos, 1846-1888. Compiled from the ramo-level receipts printed in the Anuario Estadístico de Chile 1860 and the Memorias del Ministerio de Hacienda; category totals are sums of the primary ramos as printed, with each cell citing its source volume.

Unit note: Nominal pesos of the day; no deflation applied across the series.

Sources: Memoria del Ministerio de Hacienda 1861, 1870, 1876, 1880, and 1889 (cuadros comparativos de las entradas ordinarias), and Oficina Central de Estadística, Anuario Estadístico de la Republica de Chile 1860 (entradas fiscales por ramos, 1846-1852). Santiago: Imprenta Nacional. Per-ramo levels transcribed and reconciled to each cuadro's printed total.

Indirect / internal taxes, share of revenue

ID: indirect_taxes_share_of_revenue · Unit: %

Coverage: National: 1846-1888 (17 years, 17 obs.)

Indirect and internal taxes (estanco, alcabala, papel sellado) as a percentage of total ordinary fiscal revenue. Computed by this project as revenue_indirect_taxes_pesos divided by revenue_total_ordinary_pesos, times 100. Both inputs are PRIMARY per-ramo revenue levels in nominal pesos, transcribed from the Memorias de Hacienda and the Anuario Estadístico fiscal cuadros and reconciled to each source's printed total; the share therefore carries no secondary-compilation lineage. Coverage follows the extracted level years.

Sources: Memoria del Ministerio de Hacienda 1861, 1870, 1876, 1880, and 1889 (cuadros comparativos de las entradas ordinarias), and Oficina Central de Estadística, Anuario Estadístico de la Republica de Chile 1860 (entradas fiscales por ramos, 1846-1852). Santiago: Imprenta Nacional. Per-ramo levels transcribed and reconciled to each cuadro's printed total.

Mining tax revenue (nominal pesos)

ID: revenue_mining_taxes_pesos · Unit: pesos

Coverage: National: 1846-1888 (17 years, 17 obs.)

Ordinary fiscal revenue from levies specific to mining, in nominal pesos, 1846-1888. Recorded as zero before the nitrate era by construction, since pre-nitrate mining receipts flowed through other ramos. Compiled from the ramo-level receipts printed in the Anuario Estadístico de Chile 1860 and the Memorias del Ministerio de Hacienda; category totals are sums of the primary ramos as printed, with each cell citing its source volume.

Unit note: Nominal pesos of the day; no deflation applied across the series.

Sources: Memoria del Ministerio de Hacienda 1861, 1870, 1876, 1880, and 1889 (cuadros comparativos de las entradas ordinarias), and Oficina Central de Estadística, Anuario Estadístico de la Republica de Chile 1860 (entradas fiscales por ramos, 1846-1852). Santiago: Imprenta Nacional. Per-ramo levels transcribed and reconciled to each cuadro's printed total.

Mining taxes, share of revenue

ID: mining_taxes_share_of_revenue · Unit: %

Coverage: National: 1846-1888 (17 years, 17 obs.)

Mining taxes (salitre and yodo export duties, guano, patentes de minas) as a percentage of total ordinary fiscal revenue. Computed by this project as revenue_mining_taxes_pesos divided by revenue_total_ordinary_pesos, times 100. Both inputs are PRIMARY per-ramo revenue levels in nominal pesos, transcribed from the Memorias de Hacienda and the Anuario Estadístico fiscal cuadros and reconciled to each source's printed total; the share therefore carries no secondary-compilation lineage. Coverage follows the extracted level years.

Sources: Memoria del Ministerio de Hacienda 1861, 1870, 1876, 1880, and 1889 (cuadros comparativos de las entradas ordinarias), and Oficina Central de Estadística, Anuario Estadístico de la Republica de Chile 1860 (entradas fiscales por ramos, 1846-1852). Santiago: Imprenta Nacional. Per-ramo levels transcribed and reconciled to each cuadro's printed total.

Other ordinary revenue (nominal pesos)

ID: revenue_other_taxes_pesos · Unit: pesos

Coverage: National: 1846-1888 (17 years, 17 obs.)

Residual ordinary fiscal revenue outside the customs, direct, indirect, and mining categories, in nominal pesos, 1846-1888; before 1853 it includes the diezmo (tithe) receipts, assigned here by convention. Compiled from the ramo-level receipts printed in the Anuario Estadístico de Chile 1860 and the Memorias del Ministerio de Hacienda; category totals are sums of the primary ramos as printed, with each cell citing its source volume.

Unit note: Nominal pesos of the day; no deflation applied across the series.

Sources: Memoria del Ministerio de Hacienda 1861, 1870, 1876, 1880, and 1889 (cuadros comparativos de las entradas ordinarias), and Oficina Central de Estadística, Anuario Estadístico de la Republica de Chile 1860 (entradas fiscales por ramos, 1846-1852). Santiago: Imprenta Nacional. Per-ramo levels transcribed and reconciled to each cuadro's printed total.

Other ordinary revenue, share of revenue

ID: `other_taxes_share_of_revenue` · Unit: %

Coverage: National: 1846-1888 (17 years, 17 obs.)

Other ordinary revenue (railways, post, mint, fees, miscellaneous) as a percentage of total ordinary fiscal revenue. Computed by this project as `revenue_other_taxes_pesos` divided by `revenue_total_ordinary_pesos`, times 100. Both inputs are PRIMARY per-ramo revenue levels in nominal pesos, transcribed from the Memorias de Hacienda and the Anuario Estadístico fiscal cuadros and reconciled to each source's printed total; the share therefore carries no secondary-compilation lineage. Coverage follows the extracted level years.

Sources: Memoria del Ministerio de Hacienda 1861, 1870, 1876, 1880, and 1889 (cuadros comparativos de las entradas ordinarias), and Oficina Central de Estadística, Anuario Estadístico de la Republica de Chile 1860 (entradas fiscales por ramos, 1846-1852). Santiago: Imprenta Nacional. Per-ramo levels transcribed and reconciled to each cuadro's printed total.

Total ordinary fiscal revenue (nominal pesos)

ID: `revenue_total_ordinary_pesos` · Unit: pesos

Coverage: National: 1846-1888 (17 years, 17 obs.)

Total ordinary fiscal revenue of the central state, in nominal pesos, 1846-1888: the sum of the customs, direct, indirect, mining, and other categories. Compiled from the ramo-level receipts printed in the Anuario Estadístico de Chile 1860 and the Memorias del Ministerio de Hacienda; category totals are sums of the primary ramos as printed, with each cell citing its source volume.

Unit note: Nominal pesos of the day; no deflation applied across the series.

Sources: Memoria del Ministerio de Hacienda 1861, 1870, 1876, 1880, and 1889 (cuadros comparativos de las entradas ordinarias), and Oficina Central de Estadística, Anuario Estadístico de la Republica de Chile 1860 (entradas fiscales por ramos, 1846-1852). Santiago: Imprenta Nacional. Per-ramo levels transcribed and reconciled to each cuadro's printed total.

Total fiscal expenditure

ID: `fiscal_expenditure_total_nat` · Unit: pesos

Coverage: National: 1901-1913 (13 years, 13 obs.)

Total fiscal expenditure of the Chilean state, 1901-1913, in current pesos (moneda corriente).

Sources: Aldana, Abelardo. 1914. Resumen de la Hacienda Pública de Chile, 1833-1914. Santiago: Imprenta Universitaria.

Government current revenue

ID: `gov_current_revenue_nat` · Unit: pesos

Coverage: National: 1960-1970 (11 years, 11 obs.)

Current revenue of the general government, 1960-1970, from the national government accounts.

Sources: Memoria del Ministerio de Hacienda and Dirección de Presupuestos y Contraloría General de la República, Cuenta de la Inversión / Cálculo de Entradas y Gastos, various years.

Public education expenditure

ID: `education_spending_total` · Unit: pesos

Coverage: National: 1850-1858 (9 years, 9 obs.)

Total central-government expenditure on education, 1850-1858, summed across the funded institutions (Instituto Nacional, the university, the provincial liceos, the seminaries, the normal school and the arts academies).

Sources: Oficina Central de Estadística. 1861. Anuario Estadístico de la República de Chile, año 1860 (Tomo I). Santiago: Imprenta Nacional.

Demographics

Rural population (department)

ID: ruralpop · Unit: persons

Coverage: Department: 1865-1920 (6 years, 435 obs.)

Department-level rural population, Vépares department-level historical dataset. The series mixes units across publication periods (ISSUE-009 in the project's known issues) and is not internally consistent; before citing a specific cell, verify the unit against the source attribution at that year.

Note: units mixed across the period.

Sources: *Censos de Poblaci3n de Chile (Oficina Central de Estadística, Direcci3n General de Estadística e Instituto Nacional de Estadísticas)*, various census years.

Female population, commune (1992)

ID: poblacion_mujeres_1992 · Unit: count

Coverage: Comuna: 1992 (1 year, 329 obs.)

Female population counted by comuna at the 1992 population and housing census, from the born-digital INE census volume (Cuadro 1). Comuna totals reconcile to the national census population. A single-year cross-section.

Sources: *Censo 1992 (INE, born-digital volumen)*

Male population, commune (1992)

ID: poblacion_hombres_1992 · Unit: count

Coverage: Comuna: 1992 (1 year, 329 obs.)

Male population counted by comuna at the 1992 population and housing census, from the born-digital INE census volume (Cuadro 1). Comuna totals reconcile to the national census population. A single-year cross-section.

Sources: *Censo 1992 (INE, born-digital volumen)*

Rural population share (1935)

ID: ruralpop_pct · Unit: %

Coverage: Comuna: 1935 (1 year, 277 obs.)

Share of the comuna population classified as rural, in %, in the 1935 commune frame, from the curated research assembly regime-state 1935.xlsx, the author's compilation of official mid-1930s comuna statistics. The assembly carries no page-level citation, so the series documents a compilation rather than a direct extraction. A single-year cross-section used as a control in the regime-state analyses.

Female population, commune (1970)

ID: poblacion_mujeres_1970 · Unit: count

Coverage: Comuna: 1970 (1 year, 250 obs.)

Female population counted by comuna at the 1970 population census. Extracted from the CIREN folletos Características Básicas de la Poblaci3n; the printed hombres + mujeres = total identity holds for every comuna. Coverage follows the folleto set processed to date, so a few comunas are absent.

Sources: *Censo 1970 CIREN folleto SANTIAGO (Características Básicas de la Poblaci3n); Censo 1970 - Características básicas de la poblacion, NUBLE (INE/CIREN); Censo 1970 CIREN folleto VALPARAISO (Características Básicas de la Poblaci3n); Censo 1970 CIREN folleto OHIGGINS (Características Básicas de la Poblaci3n); and 1 further sources*

Male population, commune (1970)

ID: poblacion_hombres_1970 · Unit: count

Coverage: Comuna: 1970 (1 year, 250 obs.)

Male population counted by comuna at the 1970 population census. Extracted from the CIREN folletos Características Básicas de la Población; the printed hombres + mujeres = total identity holds for every comuna. Coverage follows the folleto set processed to date, so a few comunas are absent.

Sources: Censo 1970 CIREN folleto SANTIAGO (Características Básicas de la Población); Censo 1970 - Características básicas de la población, NUBLE (INE/CIREN); Censo 1970 CIREN folleto VALPARAISO (Características Básicas de la Población); Censo 1970 CIREN folleto OHIGGINS (Características Básicas de la Población); and 1 further sources

Rural population, commune (1970)

ID: poblacion_rural_1970 · Unit: count

Coverage: Comuna: 1970 (1 year, 222 obs.)

Population living outside localities classified as urban by the 1970 census, by comuna. Extracted from the CIREN folletos Características Básicas de la Población; the printed hombres + mujeres = total identity holds for every comuna. Coverage follows the folleto set processed to date, so a few comunas are absent.

Sources: Censo 1970 CIREN folleto SANTIAGO (Características Básicas de la Población); Censo 1970 CIREN folleto VALPARAISO (Características Básicas de la Población); Censo 1970 CIREN folleto OHIGGINS (Características Básicas de la Población); Censo 1970 CIREN folleto CAUTIN (Características Básicas de la Población); and 1 further sources

Urban population, commune (1970)

ID: poblacion_urbana_1970 · Unit: count

Coverage: Comuna: 1970 (1 year, 222 obs.)

Population living in localities classified as urban by the 1970 census, by comuna. Extracted from the CIREN folletos Características Básicas de la Población; the printed hombres + mujeres = total identity holds for every comuna. Coverage follows the folleto set processed to date, so a few comunas are absent.

Santiago.; and 1 further sources

Estimated population (1928)

ID: poblacion_media_1928 · Unit: count

Coverage: Province: 1928 (1 year, 17 obs.) · Department: 1928 (1 year, 64 obs.)

Estimated mid-year (media) population for 1928, by department and province, from the Anuario Estadístico de Chile 1928 (Dirección General de Estadística). An administrative intercensal estimate between the 1920 and 1930 censuses, not a census enumeration. A single-year cross-section.

Sources: Anuario Estadístico de la Republica de Chile, Año 1928 (Dirección General de Estadística)

Urban population share

ID: pct_urbana_prov · Unit: %

Coverage: Province: 1895-1920 (3 years, 69 obs.)

Population living in urban places as a share of the provincial total at the censuses of 1895, 1907 and 1920.

Unit note: 1895-1920

Sources: Dirección General de Estadística. 1927. *Sinopsis Estadística de Chile, 1924-1927*. Santiago.

Rural population (province)

ID: poblacion_rural · Unit: persons

Coverage: Province: 1895-1920 (3 years, 68 obs.)

Province-level rural population (population residing outside designated urban centers) recorded in the Sinopsis Estadística de Chile 1924-1927. The urban-rural classification follows the contemporary statistical convention, which varied across census years; comparison across years is approximate.

Unit note: Unit field currently blank; should read 'persons'.

Note: urban and rural definitions drift across censuses.

Sources: Dirección General de Estadística. 1927. *Sinopsis Estadística de Chile, 1924-1927*, p. 27. Santiago.; Oficina Central de Estadística. 1908. *Censo de la República de Chile levantado el 28 de Noviembre de 1907*. Urban population (province)

ID: poblacion_urbana · Unit: persons

Coverage: Province: 1895-1920 (3 years, 68 obs.)

Province-level urban population (population residing in designated urban centers) recorded in the Sinopsis Estadística de Chile 1924-1927. As with the rural series, the urban classification varied across census years.

Unit note: Unit field currently blank; should read 'persons'.

Note: urban and rural definitions drift across censuses.

Sources: Dirección General de Estadística. 1927. *Sinopsis Estadística de Chile, 1924-1927*, p. 27. Santiago.; Oficina Central de Estadística. 1908. *Censo de la República de Chile levantado el 28 de Noviembre de 1907*. Santiago: Sociedad Imprenta y Litografía Universo.; Dirección General de Estadística. 1931. *X Censo de Población de la República de Chile, 27 de noviembre de 1930*. Santiago.

Urbanization Rate (%)

ID: pct_poblacion_urbana · Unit: %

Coverage: Province: 1895-1920 (3 years, 66 obs.)

Urban population as a percentage of total province population, computed at the source from contemporary urban-rural classifications. The series shows the early phase of Chile's urban transition, which accelerated sharply after 1930.

Sources: Dirección General de Estadística. 1927. *Sinopsis Estadística de Chile, 1924-1927*, p. 27. Santiago.; Dirección General de Estadística. 1931. *X Censo de Población de la República de Chile, 27 de noviembre de 1930*. Santiago.

Population density

ID: `densidad_hab_por_km2` · Unit: persons per km²

Coverage: Province: 1900-1930 (3 years, 65 obs.)

Province-level population density, persons per square kilometer, computed as the ratio of total province population to the province's territorial extent. Coverage is sparse (three observation years) and the territorial denominator predates the 1928 administrative reorganization for two of the three years.

Unit note: Unit field currently blank; should read 'persons per km²'.

Note: sparse observations.

In-migrants as a share of population

ID: `pct_inmigrantes_prov` · Unit: %

Coverage: Province: 1960 (1 year, 25 obs.)

Residents born outside the province as a share of provincial population at the 1960 census, a measure of the internal-migration draw of each province.

Unit note: 1960

Sources: Véjares, Maximiliano. *Forthcoming. Compiled historical dataset, Chile, pre-1973, multi-source. Net Zero Industrial Policy Lab, Johns Hopkins University.*

Land area, km² (1952)

ID: `superficie_km2_1952` · Unit: count

Coverage: Province: 1952 (1 year, 25 obs.)

Territorial extent of each province in square kilometers as printed in Censo 1952, Tomo 1 (Resumen del País), Servicio Nacional de Estadística y Censos. Reflects the administrative boundaries in force at the 1952 census and serves as the denominator of `densidad_1952`. A single-year cross-section.

Sources: *Censo 1952 Tomo 1 - Resumen del Pais (Servicio Nacional de Estadística y Censos)*

Married population 15+ (1952)

ID: `casados_1952` · Unit: count

Coverage: Province: 1952 (1 year, 25 obs.)

Persons aged 15 and over declaring themselves married at the 1952 census, by province, from the civil-status table of Censo 1952, Tomo 1 (Resumen del País), Servicio Nacional de Estadística y Censos. A single-year cross-section; `solteros_1952` and `viudos_1952` carry the other civil-status categories.

Sources: *Censo 1952 Tomo 1 - Resumen del Pais (Servicio Nacional de Estadística y Censos)*

Population density (1952)

ID: `densidad_1952` · Unit: count

Coverage: Province: 1952 (1 year, 25 obs.)

Population per square kilometer at the 1952 census, by province, as printed in Censo 1952, Tomo 1 (Resumen del País), Servicio Nacional de Estadística y Censos: the ratio of the census population to the provincial area (`superficie_km2_1952`). A single-year cross-section.

Sources: *Censo 1952 Tomo 1 - Resumen del Pais (Servicio Nacional de Estadística y Censos)*

Population with no religion (1952)

ID: `sin_religion_1952` · Unit: count

Coverage: Province: 1952 (1 year, 25 obs.)

Persons declaring no religion in the 1952 population census, by province, from Censo 1952, Tomo 1 (Resumen del País), Servicio Nacional de Estadística y Censos. Religion was self-declared, so the category mixes irreligion with refusal to name a denomination. A single-year cross-section.

Sources: *Censo 1952 Tomo 1 - Resumen del Pais (Servicio Nacional de Estadística y Censos)*

Protestant / Evangelical population (1952)

ID: protestantes_1952 · Unit: count

Coverage: Province: 1952 (1 year, 25 obs.)

Persons declaring a Protestant or Evangelical religion in the 1952 population census, by province, from Censo 1952, Tomo 1 (Resumen del País), Servicio Nacional de Estadística y Censos. Religion was self-declared by respondents. A single-year cross-section; the companion indicators are catolicos_1952 and sin_religion_1952.

Sources: Censo 1952 Tomo 1 - Resumen del País (Servicio Nacional de Estadística y Censos)

Single population 15+ (1952)

ID: solteros_1952 · Unit: count

Coverage: Province: 1952 (1 year, 25 obs.)

Persons aged 15 and over declaring themselves single at the 1952 census, by province, from the civil-status table of Censo 1952, Tomo 1 (Resumen del País), Servicio Nacional de Estadística y Censos. A single-year cross-section; casados_1952 and viudos_1952 carry the other civil-status categories.

Sources: Censo 1952 Tomo 1 - Resumen del País (Servicio Nacional de Estadística y Censos)

Widowed population 15+ (1952)

ID: viudos_1952 · Unit: count

Coverage: Province: 1952 (1 year, 25 obs.)

Persons aged 15 and over declaring themselves widowed at the 1952 census, by province, from the civil-status table of Censo 1952, Tomo 1 (Resumen del País), Servicio Nacional de Estadística y Censos. A single-year cross-section; casados_1952 and solteros_1952 carry the other civil-status categories.

Sources: Censo 1952 Tomo 1 - Resumen del País (Servicio Nacional de Estadística y Censos)

Births (province, 1924)

ID: nacimientos_1924_prov · Unit: births

Coverage: Province: 1924 (1 year, 24 obs.)

Births registered by province in 1924, from the Anuario demographic tables.

Sources: Dirección General de Estadística. 1927. Sinopsis Estadística de Chile, 1924-1927, p. 32. Santiago.

Chilean-born population (1952)

ID: chilenos_total_1952 · Unit: count

Coverage: Province: 1952 (1 year, 24 obs.)

Population of Chilean nationality counted in the 1952 census, by province, from Censo 1952, Tomo 1 (Resumen del País), Servicio Nacional de Estadística y Censos. The complement of extranjeros_total_1952 within the census total. A single-year cross-section.

Sources: Censo 1952 Tomo 1 - Resumen del País (Servicio Nacional de Estadística y Censos)

Foreign-born population

ID: foreigners_1895_prov · Unit: persons

Coverage: Province: 1895 (1 year, 23 obs.)

Foreign-born residents by province at the 1895 census, from the Sinopsis Estadística nationality tables.

Unit note: 1895

Sources: Oficina Central de Estadística. 1900. Sinopsis Estadística de la República de Chile, año 1900. Santiago: Imprenta Nacional.

Married persons

ID: casados_1854_prov · Unit: persons

Coverage: Province: 1854 (1 year, 14 obs.)

Married persons by province at the 1854 census, summing the male and female married counts of the marital-status tabulation.

Unit note: 1854

Sources: *Oficina Central de Estadística. 1861. Anuario Estadístico de la República de Chile, año 1860 (Tomo I), civil status by province, census of 1854. Santiago: Imprenta Nacional.*

Births (province, 1849-1858 decadal total)

ID: nacimientos_1858_prov · Unit: births

Coverage: Province: 1858 (1 year, 13 obs.)

Total births registered by province across the decade 1849-1858, summed from the by-month decadal vital-statistics return of the Memoria de Hacienda / Sinopsis 1858.

Sources: *Oficina Central de Estadística. 1861. Anuario Estadístico de la República de Chile, año 1860 (Tomo I), movimiento de población (nacimientos, defunciones y matrimonios por provincia, 1849-1858). Santiago: Imprenta Nacional.*

Deaths (province, 1849-1858 decadal total)

ID: defunciones_1858_prov · Unit: deaths

Coverage: Province: 1858 (1 year, 13 obs.)

Total deaths registered by province across the decade 1849-1858, summed from the by-month decadal vital-statistics return of 1858.

Sources: *Oficina Central de Estadística. 1861. Anuario Estadístico de la República de Chile, año 1860 (Tomo I), movimiento de población (nacimientos, defunciones y matrimonios por provincia, 1849-1858). Santiago: Imprenta Nacional.*

Marriages (province, 1849-1858 decadal total)

ID: matrimonios_1858_prov · Unit: marriages

Coverage: Province: 1858 (1 year, 13 obs.)

Total marriages registered by province across the decade 1849-1858, summed from the by-month decadal vital-statistics return of 1858.

Sources: *Oficina Central de Estadística. 1861. Anuario Estadístico de la República de Chile, año 1860 (Tomo I), movimiento de población (nacimientos, defunciones y matrimonios por provincia, 1849-1858). Santiago: Imprenta Nacional.*

Urban population (national)

ID: pob_urbana_nat · Unit: persons

Coverage: National: 1865-1982 (12 years, 12 obs.)

National urban population at the censuses from 1865 to 1982, from the demographic population series.

Sources: *Censos de Población de Chile (Oficina Central de Estadística, Dirección General de Estadística e Instituto Nacional de Estadísticas), various census years.*

Education

People who can read (department, census years)

ID: `literates_subnational` · Unit: persons

Coverage: Department: 1875-1920 (4 years, 202 obs.)

Persons recorded as able to read by department at the censuses of 1875, 1885, 1895 and 1920.

Sources: Véjares, Maximiliano. Forthcoming. Department-level historical dataset, Chile, 19th century. Compiled from primary archival sources. Net Zero Industrial Policy Lab, Johns Hopkins University.

Higher education enrollment

ID: `higher_education_enrollment` · Unit: students

Coverage: National: 1852-1990 (139 years, 139 obs.)

Total enrollment in higher education institutions (universities, technical institutes). The Chilean higher-education system was small and elite through the 19th century and expanded sharply after 1960; the series tracks both phases.

Unit note: Unit field currently blank; should read 'students'.

Primary school enrollment

ID: `primary_school_enrollment` · Unit: pupils

Coverage: National: 1852-1990 (139 years, 139 obs.)

Total primary-school enrollment. Chilean primary education expanded under the 1860 Ley General de Instrucción Primaria and again under the 1920 Ley de Instrucción Primaria Obligatoria; the series captures both expansions.

Unit note: pupils

Secondary school enrollment

ID: `secondary_school_enrollment` · Unit: pupils

Coverage: National: 1852-1990 (139 years, 139 obs.)

Total secondary-school enrollment. Secondary education was largely the preserve of the elite-serving liceos and private establishments in the 19th century; the series captures the 20th-century expansion.

Unit note: Unit field currently blank; should read 'pupils'.

Total school enrollment

ID: `total_school_enrollment` · Unit: pupils

Coverage: National: 1852-1990 (139 years, 139 obs.)

Total enrollment across primary, secondary, and higher education combined. The denominator for the primary, secondary, and higher-education share series.

Unit note: Unit field currently blank; should read 'pupils'.

Sources: Oficina Central de Estadística. ca. 1858. Sinopsis Estadística i Jeográfica de la República de Chile. Santiago: Imprenta Nacional.

Primary school attendance

ID: `escuelas_asistencia_dept` · Unit: pupils

Coverage: Department: 1909 (1 year, 76 obs.)

Mean primary-school attendance (asistencia media) by department in 1909, from the Anuario Estadístico de Chile 1909.

Unit note: 1909

Sources: Oficina Central de Estadística. 1910. Anuario Estadístico de la República de Chile, año 1909. Santiago: Sociedad Imprenta y Litografía Universo.

Primary school enrolment

ID: escuelas_matricula_dept · Unit: pupils

Coverage: Department: 1909 (1 year, 76 obs.)

Total primary-school enrolment (matrícula) by department in 1909, from the Anuario Estadístico de Chile 1909 education tables.

Unit note: 1909

Sources: Oficina Central de Estadística. 1910. *Anuario Estadístico de la República de Chile, año 1909*. Santiago: Sociedad Imprenta y Litografía Universo.

Schools (department)

ID: schools_count_dept · Unit: schools

Coverage: Department: 1875-1907 (3 years, 75 obs.)

Count of schools by department in 1875, 1895 and 1907, compiled from the Anuario and Sinopsis school registers.

Sources: Vélazquez, Maximiliano. *Forthcoming*. Department-level historical dataset, Chile, 19th century. Compiled from primary archival sources. Net Zero Industrial Policy Lab, Johns Hopkins University.

School enrolment, matrícula (department, extended)

ID: school_matricula_ext_dept · Unit: pupils

Coverage: Department: 1935 (1 year, 69 obs.)

Total school enrolment (matrícula) by department, from the extended education series 1891-1935.

Sources: Dirección General de Estadística. 1936. *Anuario Estadístico de Chile, año 1935, education section*. Santiago.

Boys' schools

ID: escuelas_h · Unit: schools

Coverage: Province: 1853-1858 (3 years, 40 obs.)

Number of boys' schools by province in the 1850s, Anuario Estadístico 1860 series. The Chilean state's first systematic effort to enumerate primary education by sex and locality; coverage is partial and the unit string in the manifest is currently blank (it should read 'schools'). Per the duplicate-resolution memo, this indicator absorbs the parallel escuelas_hombres_prov entry.

Unit note: Unit field currently blank; should read 'schools'.

Sources: Oficina Central de Estadística. 1861. *Anuario Estadístico de la República de Chile, año 1860 (Tomo I)*, schools by province, 1853-1858. Santiago: Imprenta Nacional.

Female students

ID: alumnos_m · Unit: pupils

Coverage: Province: 1853-1858 (3 years, 40 obs.)

Number of female students enrolled by province in the 1850s, Anuario Estadístico 1860 series. Parallel to escuelas_m (girls' schools count).

Unit note: Unit field currently blank; should read 'students'.

Sources: Oficina Central de Estadística. 1861. *Anuario Estadístico de la República de Chile, año 1860 (Tomo I)*, schools by province, 1853-1858. Santiago: Imprenta Nacional.

Girls' schools

ID: escuelas_m · Unit: schools

Coverage: Province: 1853-1858 (3 years, 40 obs.)

Number of girls' schools by province in the 1850s, Anuario Estadístico 1860 series. The relative count of girls' to boys' schools captures the gender gap in 19th-century Chilean primary education provision.

Unit note: Unit field currently blank; should read 'schools'.

Sources: Oficina Central de Estadística. 1861. *Anuario Estadístico de la República de Chile, año 1860 (Tomo I)*, schools by province, 1853-1858. Santiago: Imprenta Nacional.

Male students

ID: `alumnos_h` · Unit: pupils

Coverage: Province: 1853-1858 (3 years, 40 obs.)

Number of male students enrolled by province in the 1850s, Anuario Estadístico 1860 series.

Unit note: Unit field currently blank; should read 'students'.

Sources: *Oficina Central de Estadística. 1861. Anuario Estadístico de la República de Chile, año 1860 (Tomo I), schools by province, 1853-1858. Santiago: Imprenta Nacional.*

Schools (province)

ID: `escuelas_total` · Unit: schools

Coverage: Province: 1853-1858 (3 years, 40 obs.)

Total number of schools (boys + girls + mixed) by province in the 1850s, Anuario Estadístico 1860 series.

Unit note: Unit field currently blank; should read 'schools'.

Sources: *Oficina Central de Estadística. 1861. Anuario Estadístico de la República de Chile, año 1860 (Tomo I), schools by province, 1853-1858. Santiago: Imprenta Nacional.*

Students enrolled

ID: `alumnos_total` · Unit: pupils

Coverage: Province: 1853-1858 (3 years, 40 obs.)

Total number of students (male + female) enrolled by province in the 1850s, Anuario Estadístico 1860 series.

Unit note: Unit field currently blank; should read 'students'.

Sources: *Oficina Central de Estadística. 1861. Anuario Estadístico de la República de Chile, año 1860 (Tomo I), schools by province, 1853-1858. Santiago: Imprenta Nacional.*

Female pupils enrolled (province, 1850s)

ID: `alumnos_mujeres_prov` · Unit: pupils

Coverage: Province: 1855-1858 (2 years, 27 obs.)

Female pupils enrolled in schools by province in the 1850s, from the early education returns of the *Memorias de Instrucción Pública*.

Sources: *Oficina Central de Estadística. 1861. Anuario Estadístico de la República de Chile, año 1860 (Tomo I), private schools by province, 1853-1858. Santiago: Imprenta Nacional.; Oficina Central de Estadística. 1861. Anuario Estadístico de la República de Chile, año 1860 (Tomo I), municipal schools by province, 1853-1855. Santiago: Imprenta Nacional.; Oficina Central de Estadística. 1861. Anuario Estadístico de la República de Chile, año 1860 (Tomo I), fiscal schools by province, 1853-1855. Santiago: Imprenta Nacional.*

Male pupils enrolled (province, 1850s)

ID: `alumnos_hombres_prov` · Unit: pupils

Coverage: Province: 1855-1858 (2 years, 27 obs.)

Male pupils enrolled in schools by province in the 1850s, from the early education returns of the *Memorias de Instrucción Pública*.

Sources: *Oficina Central de Estadística. 1861. Anuario Estadístico de la República de Chile, año 1860 (Tomo I), private schools by province, 1853-1858. Santiago: Imprenta Nacional.; Oficina Central de Estadística. 1861. Anuario Estadístico de la República de Chile, año 1860 (Tomo I), municipal schools by province, 1853-1855. Santiago: Imprenta Nacional.; Oficina Central de Estadística. 1861. Anuario Estadístico de la República de Chile, año 1860 (Tomo I), fiscal schools by province, 1853-1855. Santiago: Imprenta Nacional.*

Pupils enrolled (province, 1850s)

ID: `alumnos_total_prov` · Unit: pupils

Coverage: Province: 1855-1858 (2 years, 27 obs.)

Pupils enrolled in schools by province in the 1850s, from the early education returns of the *Memorias de Instrucción Pública*.

Sources: Oficina Central de Estadística. 1861. Anuario Estadístico de la República de Chile, año 1860 (Tomo I), private schools by province, 1853-1858. Santiago: Imprenta Nacional.; Oficina Central de Estadística. 1861. Anuario Estadístico de la República de Chile, año 1860 (Tomo I), fiscal schools by province, 1853-1855. Santiago: Imprenta Nacional.

Primary education attained (1952)

ID: `con_instruccion_primaria_1952` · Unit: count

Coverage: Province: 1952 (1 year, 25 obs.)

Persons reporting primary school as their level of instruction at the 1952 census, by province, from Censo 1952, Tomo 1 (Resumen del País), Servicio Nacional de Estadística y Censos. Measures attainment declared to enumerators, not enrollment. A single-year cross-section; secondary and university attainment are separate indicators.

Sources: Censo 1952 Tomo 1 - Resumen del Pais (Servicio Nacional de Estadística y Censos)

Secondary education attained (1952)

ID: `con_instruccion_secundaria_1952` · Unit: count

Coverage: Province: 1952 (1 year, 25 obs.)

Persons reporting secondary school as their level of instruction at the 1952 census, by province, from Censo 1952, Tomo 1 (Resumen del País), Servicio Nacional de Estadística y Censos. Measures attainment declared to enumerators, not enrollment. A single-year cross-section.

Sources: Censo 1952 Tomo 1 - Resumen del Pais (Servicio Nacional de Estadística y Censos)

University education attained (1952)

ID: `con_instruccion_universitaria_1952` · Unit: count

Coverage: Province: 1952 (1 year, 25 obs.)

Persons reporting university-level instruction at the 1952 census, by province, from Censo 1952, Tomo 1 (Resumen del País), Servicio Nacional de Estadística y Censos. Measures attainment declared to enumerators, not enrollment. A single-year cross-section.

Sources: Censo 1952 Tomo 1 - Resumen del Pais (Servicio Nacional de Estadística y Censos)

Primary school attendance (1914)

ID: `asistencia_media_total_1914` · Unit: count

Coverage: Province: 1914 (1 year, 24 obs.)

Average daily attendance (*asistencia media*) in public primary schools by province in 1914, from the *Anuario Estadístico de Chile 1914*, Vol. V (Instrucción). The stricter measure of effective schooling, typically well below enrollment (`matricula_total_1914`). A single-year cross-section.

Sources: Anuario Estadístico de la Republica de Chile, Año 1914, Vol. V Instruccion

Primary school enrollment (1914)

ID: `matricula_total_1914` · Unit: count

Coverage: Province: 1914 (1 year, 24 obs.)

Pupils enrolled (*matrícula*) in public primary schools by province in 1914, from the *Anuario Estadístico de Chile 1914*, Vol. V (Instrucción). Enrollment overstates effective schooling; average attendance (`asistencia_media_total_1914`) is the stricter measure. A single-year cross-section.

Sources: Anuario Estadístico de la Republica de Chile, Año 1914, Vol. V Instruccion

Public primary schools (1913)

ID: escuelas_publicas_primarias_1913 · Unit: count

Coverage: Province: 1913 (1 year, 24 obs.)

Number of public primary schools in operation by province in 1913, from the Anuario Estadístico de Chile 1913, Vol. V (Instrucción). Private schools are excluded. A single-year cross-section; escuelas_1914 carries the following year.

Sources: Anuario Estadístico de la Republica de Chile, Año 1913, Vol. V Instruccion

Public primary schools (1914)

ID: escuelas_1914 · Unit: count

Coverage: Province: 1914 (1 year, 24 obs.)

Number of public primary schools in operation by province in 1914, from the Anuario Estadístico de Chile 1914, Vol. V (Instrucción). Private schools are excluded. A single-year cross-section; the companion enrollment and attendance indicators are matricula_total_1914 and asistencia_media_total_1914.

Sources: Anuario Estadístico de la Republica de Chile, Año 1914, Vol. V Instruccion

Agriculture

Cattle stock, head (1965-1974)

ID: `existencias_bovinos_cabezas` · Unit: head

Coverage: Province: 1965-1973 (9 years, 225 obs.)

Cattle stock in head by province, 1965 to 1974, from ODEPA's Estadísticas Agropecuarias compiled from the INE livestock returns.

Sources: *ODEPA Estadísticas Agropecuarias 1965-1974 (Min. Agricultura, 1976)*

Sheep stock, head (1965-1974)

ID: `existencias_ovinos_cabezas` · Unit: head

Coverage: Province: 1965-1974 (9 years, 225 obs.)

Sheep stock in head by province, 1965 to 1974, from ODEPA's Estadísticas Agropecuarias.

Sources: *ODEPA Estadísticas Agropecuarias 1965-1974 (Min. Agricultura, 1976)*

Pig stock, head (1965-1974)

ID: `existencias_porcinos_cabezas` · Unit: head

Coverage: Province: 1965-1973 (8 years, 200 obs.)

Pig stock in head by province, 1965 to 1974, from ODEPA's Estadísticas Agropecuarias.

Sources: *ODEPA Estadísticas Agropecuarias 1965-1974 (Min. Agricultura, 1976)*

Barley production

ID: `barley_production` · Unit: metric tons

Coverage: National: 1860-1990 (131 years, 131 obs.)

Annual national production of barley in metric tons, compiled from the Anuario Estadístico and Sinopsis series through 1929 and from the Dirección General de Estadística (and INE after 1970) thereafter. Pre-1880 figures are partial and reflect the agricultural reporting capacity of the early Anuarios.

Sources: *Oficina Central de Estadística, Dirección General de Estadística e Instituto Nacional de Estadísticas, Anuario Estadístico de Chile (sección Agricultura), and Sociedad Nacional de Agricultura, various years.*

Bean production

ID: `bean_production` · Unit: metric tons

Coverage: National: 1860-1990 (131 years, 131 obs.)

Annual national production of dry beans in metric tons. Beans were a staple of the Chilean diet and a significant 19th-century export to neighboring Andean economies; the series reflects both subsistence and export production.

Sources: *Oficina Central de Estadística, Dirección General de Estadística e Instituto Nacional de Estadísticas, Anuario Estadístico de Chile (sección Agricultura), and Sociedad Nacional de Agricultura, various years.*

Maize production

ID: `maize_production` · Unit: metric tons

Coverage: National: 1860-1990 (131 years, 131 obs.)

Annual national maize production in metric tons. Maize was a central component of Chilean agriculture from colonial origins; the modern series reflects both feed and food production.

Sources: *Oficina Central de Estadística, Dirección General de Estadística e Instituto Nacional de Estadísticas, Anuario Estadístico de Chile (sección Agricultura), and Sociedad Nacional de Agricultura, various years.*

Pea production

ID: `pea_production` · Unit: metric tons

Coverage: National: 1860-1990 (131 years, 131 obs.)

Annual national production of dry peas in metric tons. A minor crop relative to wheat and beans; coverage is partial in early decades.

Sources: *Oficina Central de Estadística, Dirección General de Estadística e Instituto Nacional de Estadísticas, Anuario Estadístico de Chile (sección Agricultura), and Sociedad Nacional de Agricultura, various years.*

Potato production

ID: `potato_production` · Unit: metric tons

Coverage: National: 1860-1990 (131 years, 131 obs.)

Annual national potato production in metric tons. Potatoes expanded as a southern Chilean crop after the 1850s German immigration to Valdivia and Llanquihue; the series captures that geographic expansion.

Sources: *Oficina Central de Estadística, Dirección General de Estadística e Instituto Nacional de Estadísticas, Anuario Estadístico de Chile (sección Agricultura), and Sociedad Nacional de Agricultura, various years.*

Wheat production

ID: `wheat_production` · Unit: metric tons

Coverage: National: 1860-1990 (131 years, 131 obs.)

Annual national wheat production in metric tons. Chile was a major wheat exporter to California, Australia, and Britain during the 1850s-1880s 'cereal cycle'; the series tracks both that export boom and the later transition to import dependence.

Unit note: Pre-1929 figures may be in quintales métricos (0.1 MT) in source documents; the compiled series reports them in metric tons. Verify against the source if magnitude appears anomalous.

Sources: *Oficina Central de Estadística, Dirección General de Estadística e Instituto Nacional de Estadísticas, Anuario Estadístico de Chile (sección Agricultura), and Sociedad Nacional de Agricultura, various years.*

Chickpea production

ID: `chickpea_production` · Unit: metric tons

Coverage: National: 1860-1990 (127 years, 127 obs.)

Annual national chickpea production in metric tons. Chickpeas were a minor but persistent rotation crop in the central valley; coverage is intermittent before 1900.

Sources: *Oficina Central de Estadística, Dirección General de Estadística e Instituto Nacional de Estadísticas, Anuario Estadístico de Chile (sección Agricultura), and Sociedad Nacional de Agricultura, various years.*

Wine production

ID: `wine_production` · Unit: hectoliters

Coverage: National: 1860-1955 (96 years, 96 obs.)

Annual national wine production in hectoliters. The series ends in 1955 because later production figures are reported in liters and under different reporting conventions; the post-1955 figures are not in this series.

Note: series endpoints reflect a methodological change.

Sources: *Oficina Central de Estadística, Dirección General de Estadística e Instituto Nacional de Estadísticas, Anuario Estadístico de Chile (sección Agricultura), and Sociedad Nacional de Agricultura, various years.*

Cattle output

ID: `cattle_output` · Unit: head of cattle

Coverage: National: 1860-1940 (81 years, 81 obs.)

Annual head of cattle slaughtered nationally for meat. The series ends in 1940 because later cattle statistics changed methodology and unit (carcass weight rather than head); the post-1940 figures live under a different indicator family.

Note: series endpoints reflect a methodological change.

Sources: *Oficina Central de Estadística, Dirección General de Estadística e Instituto Nacional de Estadísticas, Anuario Estadístico de Chile (sección Agricultura), and Sociedad Nacional de Agricultura, various years.*

Potato production, tons (1972-1974)

ID: `papas_produccion_ton` · Unit: metric tons

Coverage: Province: 1972-1974 (3 years, 67 obs.)

Potato production in metric tons by province, 1972 to 1974, from ODEPA's Estadísticas Agropecuarias.

Note: published for research use only.

Sources: *ODEPA Estadísticas Agropecuarias 1965-1974 (Min. Agricultura, 1976)*

Wheat area sown, hectares (1972-1974)

ID: `trigo_superficie_ha` · Unit: hectares

Coverage: Province: 1972-1974 (3 years, 66 obs.)

Area sown with wheat in hectares by province, 1972 to 1974, from ODEPA's Estadísticas Agropecuarias.

Note: published for research use only.

Sources: *ODEPA Estadísticas Agropecuarias 1965-1974 (Min. Agricultura, 1976)*

Wheat production, tons (1972-1974)

ID: `trigo_produccion_ton` · Unit: metric tons

Coverage: Province: 1972-1974 (3 years, 66 obs.)

Wheat production in metric tons by province, 1972 to 1974, from ODEPA's Estadísticas Agropecuarias.

Note: published for research use only.

Sources: *ODEPA Estadísticas Agropecuarias 1965-1974 (Min. Agricultura, 1976)*

Maize production, tons (1972-1974)

ID: `maiz_produccion_ton` · Unit: metric tons

Coverage: Province: 1972-1974 (3 years, 54 obs.)

Maize production in metric tons by province, 1972 to 1974, from ODEPA's Estadísticas Agropecuarias.

Note: published for research use only.

Sources: *ODEPA Estadísticas Agropecuarias 1965-1974 (Min. Agricultura, 1976)*

Milk delivered to plants, thousand litres (1973 to 1974)

ID: `leche_vendida_plantas_miles_lts` · Unit: thousand litres

Coverage: Province: 1973-1974 (2 years, 40 obs.)

Milk delivered to processing plants in thousands of litres by province, 1973 to 1974, from ODEPA's Estadísticas Agropecuarias.

Note: published for research use only.

Sources: *ODEPA Estadísticas Agropecuarias 1965-1974 (Min. Agricultura, 1976)*

Wheat harvested

ID: wheat_1924_prov · Unit: quintals

Coverage: Province: 1924 (1 year, 17 obs.)

White wheat harvested by province in 1924, in metric quintals, from the Anuario agricultural statistics.

Unit note: 1924

Sources: Dirección General de Estadística. 1927. *Sinopsis Estadística de Chile, 1924-1927*. Santiago.

Apple production, tons (1974)

ID: manzanas_produccion_ton · Unit: metric tons

Coverage: Province: 1974 (1 year, 12 obs.)

Apple production in metric tons by province in 1974, from ODEPA's Estadísticas Agropecuarias fruit returns.

Sources: ODEPA Estadísticas Agropecuarias 1965-1974 (Min. Agricultura, 1976)

Table grape production, tons (1974)

ID: uva_mesa_produccion_ton · Unit: metric tons

Coverage: Province: 1974 (1 year, 9 obs.)

Table grape production in metric tons by province in 1974, from ODEPA's Estadísticas Agropecuarias fruit returns.

Sources: ODEPA Estadísticas Agropecuarias 1965-1974 (Min. Agricultura, 1976)

Vital statistics

Deaths

ID: defunciones · Unit: deaths

Coverage: Province: 1900-1935 (3 years, 60 obs.) · Department: 1876-1880 (5 years, 270 obs.)

Annual count of deaths by province, Sinopsis Estadística de Chile 1924-1927 and earlier Anuario sources. Per the duplicate-resolution memo, scheduled to merge with defunciones_1858_prov into a renamed deaths_province indicator.

Unit note: Unit field currently blank; should read 'deaths'.

Note: scheduled for merge with a sibling series.

Sources: Anuario Estadístico de la Republica de Chile, entrega 1879-1880 (Yumpu 56511022); Anuario Estadístico de la Republica de Chile, entrega 1876-1877 (Yumpu 56511011); Anuario Estadístico de la Republica de Chile, entrega 1877-1878 (Yumpu 56511013); Anuario Estadístico de la Republica de Chile, entrega 1878-1879 (Yumpu 56511018); and 1 further sources

Marriages

ID: matrimonios · Unit: marriages

Coverage: Province: 1900-1935 (3 years, 60 obs.) · Department: 1876-1880 (5 years, 269 obs.)

Annual count of marriages by province, Sinopsis Estadística de Chile 1924-1927. Per the duplicate-resolution memo, scheduled to merge with matrimonios_total, matrimonios_1858_prov, and matrimonios_hist_dept into a renamed marriages_province indicator.

Unit note: Unit field currently blank; should read 'marriages'.

Note: scheduled for merge with a sibling series.

Sources: Anuario Estadístico de la Republica de Chile, entrega 1879-1880 (Yumpu 56511022); Anuario Estadístico de la Republica de Chile, entrega 1876-1877 (Yumpu 56511011); Anuario Estadístico de la Republica de Chile, entrega 1877-1878 (Yumpu 56511013); Anuario Estadístico de la Republica de Chile, entrega 1878-1879 (Yumpu 56511018); and 1 further sources

Baptisms (parish registers)

ID: bautismos · Unit: count

Coverage: Department: 1876-1880 (5 years, 270 obs.)

Baptisms registered by department, 1876-1880, from the vital-statistics cuadros of the Anuario Estadístico de la República de Chile entregas for those years (read from the Yumpu page images of the yearbook collection). Before the civil registry opened in 1885, parish baptisms are the working proxy for births. Column sums verified against printed or errata-corrected national totals.

Sources: Anuario Estadístico de la Republica de Chile, entrega 1879-1880 (Yumpu 56511022); Anuario Estadístico de la Republica de Chile, entrega 1876-1877 (Yumpu 56511011); Anuario Estadístico de la Republica de Chile, entrega 1877-1878 (Yumpu 56511013); Anuario Estadístico de la Republica de Chile, entrega 1878-1879 (Yumpu 56511018)

Crude birth rate

ID: crude_birth_rate · Unit: per 1,000 population

Coverage: National: 1848-1990 (143 years, 143 obs.)

Number of live births per 1,000 population per year, Mamalakis (1980) Vol 2 Table 2.1. The published series carries unit-splice corruption: the 1848-1899 cells run 45,862 to 64,306, which are absolute birth counts not rates; the 1900-onward cells (38.5 etc.) are correctly normalized rates. Do not cite the pre-1900 cells until the upstream reconciliation lands.

Sources: Anuario Estadístico de la Republica de Chile, entrega 1879-1880 (Yumpu 56511022); Anuario Estadístico de la Republica de Chile, entrega 1876-1877 (Yumpu 56511011); Anuario Estadístico de la Republica de Chile, entrega 1877-1878 (Yumpu 56511013); Anuario Estadístico de la Republica de Chile, entrega 1878-1879 (Yumpu 56511018); and 3 further sources

Crude death rate

ID: `crude_death_rate` · Unit: per 1,000 population

Coverage: National: 1848-1990 (143 years, 143 obs.)

Number of deaths per 1,000 population per year. The Chilean mortality transition began around 1900 and accelerated after 1930; the series tracks the decline from roughly 30 per 1,000 in the 1850s to under 6 per 1,000 by 1990. Inspect for the same unit-splice pattern as `crude_birth_rate` before citing.

Sources: Servicio de Registro Civil e Identificación and Dirección General de Estadística e Instituto Nacional de Estadísticas, Anuario de Demografía, with the Censos de Población de Chile, various years.

Natural population growth rate

ID: `natural_population_growth_rate` · Unit: %

Coverage: National: 1848-1990 (143 years, 143 obs.)

Annual rate of natural population increase (births minus deaths, as a percent of population). Excludes migration; the complement to `net_migration_rate`.

Sources: Servicio de Registro Civil e Identificación and Dirección General de Estadística e Instituto Nacional de Estadísticas, Anuario de Demografía, with the Censos de Población de Chile, various years.

Net migration rate

ID: `net_migration_rate` · Unit: per 1,000 population

Coverage: National: 1848-1990 (143 years, 143 obs.)

Net migration (immigrants minus emigrants) per 1,000 population per year. Chile was a modest net immigrant country in the late 19th century, became net emigrant during the 1970s, and returned to net immigration after 1990.

Sources: Servicio de Registro Civil e Identificación and Dirección General de Estadística e Instituto Nacional de Estadísticas, Anuario de Demografía, with the Censos de Población de Chile, various years.

Total population growth rate

ID: `total_population_growth_rate` · Unit: %

Coverage: National: 1848-1990 (143 years, 143 obs.)

Annual rate of total population growth (natural increase plus net migration).

Sources: Servicio de Registro Civil e Identificación and Dirección General de Estadística e Instituto Nacional de Estadísticas, Anuario de Demografía, with the Censos de Población de Chile, various years.

Infant mortality rate

ID: `infant_mortality_rate` · Unit: per 1,000 live births

Coverage: National: 1848-1990 (134 years, 134 obs.)

Number of deaths under age 1 per 1,000 live births per year. The published series carries unit-splice corruption (median 31,199 against a natural ceiling around 300 in the worst historical cases). Do not cite until upstream reconciliation; the underlying Chilean infant-mortality decline from roughly 250 per 1,000 in 1900 to under 20 per 1,000 by 1990 is well-documented in secondary literature.

Sources: Servicio de Registro Civil e Identificación and Dirección General de Estadística e Instituto Nacional de Estadísticas, Anuario de Demografía, with the Censos de Población de Chile, various years.

Births (1926)

ID: `nacimientos_1926` · Unit: count

Coverage: Province: 1926 (1 year, 24 obs.) · Department: 1926 (1 year, 83 obs.)

Births registered by the civil registry in 1926, by department and province, from the Anuario Estadístico de Chile 1926, Vol. I (Demografía), Dirección General de Estadística. A single-year cross-section.

Sources: Anuario Estadístico de la Republica de Chile, Año 1926, Vol. I Demografía (Dirección General de Estadística)

Infant mortality (1926)

ID: mortalidad_infantil_1926 · Unit: count

Coverage: Province: 1926 (1 year, 24 obs.) · Department: 1926 (1 year, 83 obs.)

Deaths of infants under one year of age registered in 1926, by department and province, from the Anuario Estadístico de Chile 1926, Vol. I (Demografía). A count of infant deaths, not a rate; divide by registered births (nacimientos_1926) for an infant mortality rate. A single-year cross-section.

Sources: *Anuario Estadístico de la Republica de Chile, Año 1926, Vol. I Demografía (Dirección General de Estadística)*

Marriages (1926)

ID: matrimonios_1926 · Unit: count

Coverage: Province: 1926 (1 year, 24 obs.) · Department: 1926 (1 year, 83 obs.)

Marriages registered by the civil registry in 1926, by department and province, from the Anuario Estadístico de Chile 1926, Vol. I (Demografía), Dirección General de Estadística. A single-year cross-section.

Sources: *Anuario Estadístico de la Republica de Chile, Año 1926, Vol. I Demografía (Dirección General de Estadística)*

Deaths (1926)

ID: defunciones_1926 · Unit: count

Coverage: Province: 1926 (1 year, 23 obs.) · Department: 1926 (1 year, 83 obs.)

Deaths registered by the civil registry in 1926, by department and province, from the Anuario Estadístico de Chile 1926, Vol. I (Demografía), Dirección General de Estadística. A single-year cross-section.

Live births

ID: nacimientos · Unit: births

Coverage: Province: 1900-1935 (3 years, 60 obs.)

Annual count of live births by province, Sinopsis Estadística de Chile 1924-1927. Per the duplicate-resolution memo, scheduled to merge with nacimientos_1858_prov and nacimientos_1924_prov into a renamed births_province indicator.

Unit note: Unit field currently blank; should read 'births'.

Note: scheduled for merge with a sibling series.

Sources: *Dirección General de Estadística. 1927. Sinopsis Estadística de Chile, 1924-1927, p. 29. Santiago,; Oficina Central de Estadística. 1861. Anuario Estadístico de la República de Chile, año 1860 (Tomo I). Santiago: Imprenta Nacional.*

Baptisms (department, 1865)

ID: bautismos_1865_dept · Unit: baptisms

Coverage: Department: 1865 (1 year, 51 obs.)

Baptisms entered in parish registers by department in 1865. Before the civil registry baptisms are the working proxy for births, and the parish returns are the earliest near-complete departmental vital series.

Sources: *Véjares, Maximiliano. Forthcoming. Department-level historical dataset, Chile, 19th century. Compiled from primary archival sources. Net Zero Industrial Policy Lab, Johns Hopkins University.*

Parish-register marriages

ID: matrimonios_1865_dept · Unit: marriages

Coverage: Department: 1865 (1 year, 49 obs.)

Marriages entered in parish registers by department in 1865, the pre-civil-registry record of departmental nuptiality.

Unit note: 1865

Sources: *Véjares, Maximiliano. Forthcoming. Department-level historical dataset, Chile, 19th century. Compiled from primary archival sources. Net Zero Industrial Policy Lab, Johns Hopkins University.*

Marriage rate (modern era)

ID: `tasa_matrimonios_por_mil` · Unit: per 1,000 population

Coverage: Province: 1969-1973 (5 years, 45 obs.)

Annual number of marriages per 1,000 population, 1969-1973. Source attribution incomplete in the manifest. The marriage rate fell sharply in Chile after 1990 with the rise of cohabitation and the 2004 introduction of divorce; this series captures the high-marriage late-1960s baseline.

Note: source attribution incomplete.

Sources: *Anuario Estadístico de la Republica de Chile, entrega 1879-1880* (Yumpu 56511022); *Anuario Estadístico de la Republica de Chile, entrega 1876-1877* (Yumpu 56511011); *Anuario Estadístico de la Republica de Chile, entrega 1877-1878* (Yumpu 56511013); *Anuario Estadístico de la Republica de Chile, entrega 1878-1879* (Yumpu 56511018); and 3 further sources

Marriages (modern era)

ID: `matrimonios_total` · Unit: marriages

Coverage: Province: 1969-1973 (5 years, 45 obs.)

Annual count of marriages by province in the modern era, 1969-1973. Source attribution incomplete in the manifest. Scheduled to merge into `marriages_province`.

Note: source attribution incomplete.

Sources: *Oficina Central de Estadística. 1872. Anuario Estadístico de la República de Chile, año 1871. Santiago: Imprenta Nacional.*; *Ministerio del Interior. 1891. Memoria del Ministerio del Interior, año 1890, Tomo II. Santiago.*

Parish-register deaths

ID: `defunciones_1865_dept` · Unit: deaths

Coverage: Department: 1865 (1 year, 25 obs.)

Deaths entered in parish burial registers by department in 1865, the pre-civil-registry record of departmental mortality.

Unit note: 1865

Sources: *Véjares, Maximiliano. Forthcoming. Department-level historical dataset, Chile, 19th century. Compiled from primary archival sources. Net Zero Industrial Policy Lab, Johns Hopkins University.*

Crude mortality rate

ID: `mortality_rate_nat` · Unit: %

Coverage: National: 1849-1858 (10 years, 10 obs.)

Crude mortality rate of Chile in the 1850s, deaths as a share of population, from the early vital-statistics returns.

Sources: *Oficina Central de Estadística. 1861. Anuario Estadístico de la República de Chile, año 1860 (Tomo I). Santiago: Imprenta Nacional.*

Housing

Collective dwellings (1992)

ID: viviendas_colectivas_1992 · Unit: count

Coverage: Comuna: 1992 (1 year, 335 obs.)

Collective dwellings, such as hospitals, barracks, convents, hotels, and other institutional quarters, counted by comuna in the 1992 population and housing census (INE, volume Ciudades, Pueblos y Aldeas). The complement of viviendas_particulares_1992 within total dwellings.

Sources: Censo 1992 (INE, Ciudades Pueblos y Aldeas, born-digital)

Dwellings with electric lighting (1992)

ID: viviendas_con_alumbrado_electrico_1992 · Unit: dwellings

Coverage: Comuna: 1992 (1 year, 335 obs.)

Private occupied dwellings with electric lighting by comuna in 1992, from the 1992 census housing characterization.

Sources: Censo 1992 (INE, Ciudades Pueblos y Aldeas, born-digital)

Dwellings with other water source (1992)

ID: viviendas_agua_otra_fuente_1992 · Unit: count

Coverage: Comuna: 1992 (1 year, 335 obs.)

Dwellings drawing water from sources other than a piped network, such as wells, rivers, or water trucks, counted by comuna in the 1992 population and housing census (INE, volume Ciudades, Pueblos y Aldeas). Concentrated in rural comunas.

Sources: Censo 1992 (INE, Ciudades Pueblos y Aldeas, born-digital)

Dwellings with piped water (1992)

ID: viviendas_agua_con_caneria_1992 · Unit: count

Coverage: Comuna: 1992 (1 year, 335 obs.)

Dwellings with piped water inside the dwelling, counted by comuna in the 1992 population and housing census (INE, volume Ciudades, Pueblos y Aldeas). A basic-services indicator; the complement is split between viviendas_agua_sin_caneria_1992 and viviendas_agua_otra_fuente_1992.

Sources: Censo 1992 (INE, Ciudades Pueblos y Aldeas, born-digital)

Dwellings with public-network water (1992)

ID: viviendas_agua_red_publica_1992 · Unit: dwellings

Coverage: Comuna: 1992 (1 year, 335 obs.)

Private occupied dwellings supplied with water from the public network by comuna in 1992, from the 1992 census housing characterization.

Sources: Censo 1992 (INE, Ciudades Pueblos y Aldeas, born-digital)

Dwellings with sewerage (1992)

ID: viviendas_con_alcantarillado_1992 · Unit: dwellings

Coverage: Comuna: 1992 (1 year, 335 obs.)

Private occupied dwellings connected to a sewerage system by comuna in 1992, from the 1992 census housing characterization.

Sources: Censo 1992 (INE, Ciudades Pueblos y Aldeas, born-digital)

Dwellings without electric lighting (1992)

ID: viviendas_sin_alumbrado_electrico_1992 · Unit: count

Coverage: Comuna: 1992 (1 year, 335 obs.)

Dwellings without electric lighting, counted by comuna in the 1992 population and housing census (INE, volume Ciudades, Pueblos y Aldeas). A basic-services deficit indicator; by 1992 counts are small outside rural comunas.

Sources: Censo 1992 (INE, Ciudades Pueblos y Aldeas, born-digital)

Dwellings without piped water (1992)

ID: viviendas_agua_sin_caneria_1992 · Unit: count

Coverage: Comuna: 1992 (1 year, 335 obs.)

Dwellings whose water supply is not piped into the dwelling, counted by comuna in the 1992 population and housing census (INE, volume Ciudades, Pueblos y Aldeas). A basic-services deficit indicator.

Sources: Censo 1992 (INE, Ciudades Pueblos y Aldeas, born-digital)

Dwellings without sewerage (1992)

ID: viviendas_sin_alcantarillado_1992 · Unit: count

Coverage: Comuna: 1992 (1 year, 335 obs.)

Dwellings without connection to a sewerage system, counted by comuna in the 1992 population and housing census (INE, volume Ciudades, Pueblos y Aldeas). A basic-services deficit indicator, higher in rural and peri-urban comunas.

Sources: Censo 1992 (INE, Ciudades Pueblos y Aldeas, born-digital)

Dwellings, other tenure (1992)

ID: viviendas_tenencia_otra_1992 · Unit: count

Coverage: Comuna: 1992 (1 year, 335 obs.)

Occupied dwellings under tenure other than ownership or rental, such as ceded, employer-provided, or usufruct arrangements, counted by comuna in the 1992 population and housing census (INE, volume Ciudades, Pueblos y Aldeas).

Sources: Censo 1992 (INE, Ciudades Pueblos y Aldeas, born-digital)

Dwellings, total (1992)

ID: viviendas_total_1992 · Unit: dwellings

Coverage: Comuna: 1992 (1 year, 335 obs.)

Total occupied dwellings, private and collective, counted by comuna in the 1992 population and housing census (INE, volume Ciudades, Pueblos y Aldeas).

Sources: Censo 1992 (INE, Ciudades Pueblos y Aldeas, born-digital)

Households (1992)

ID: hogares_1992 · Unit: households

Coverage: Comuna: 1992 (1 year, 335 obs.)

Number of households (hogares) counted by comuna in the 1992 population and housing census.

Sources: Censo 1992 (INE, Ciudades Pueblos y Aldeas, born-digital)

Mobile and other dwellings (1992)

ID: viviendas_moviles_otros_1992 · Unit: count

Coverage: Comuna: 1992 (1 year, 335 obs.)

Mobile dwellings (tents, wagons, boats) and other structures not classifiable as permanent or semi-permanent, counted by comuna in the 1992 population and housing census (INE, volume Ciudades, Pueblos y Aldeas). The residual dwelling-type category; counts are small in most comunas.

Sources: Censo 1992 (INE, Ciudades Pueblos y Aldeas, born-digital)

Owner-occupied dwellings (1992)

ID: viviendas_tenencia_propia_1992 · Unit: dwellings

Coverage: Comuna: 1992 (1 year, 335 obs.)

Owner occupied private dwellings by comuna in 1992 (tenure reported as propia), from the 1992 census housing characterization.

Sources: Censo 1992 (INE, Ciudades Pueblos y Aldeas, born-digital)

Permanent dwellings (1992)

ID: viviendas_permanentes_1992 · Unit: count

Coverage: Comuna: 1992 (1 year, 335 obs.)

Dwellings of permanent construction (houses and apartments) as classified by the census, counted by comuna in the 1992 population and housing census (INE, volume Ciudades, Pueblos y Aldeas). Semi-permanent and mobile structures are carried in the companion indicators.

Sources: Censo 1992 (INE, Ciudades Pueblos y Aldeas, born-digital)

Private dwellings (1992)

ID: viviendas_particulares_1992 · Unit: count

Coverage: Comuna: 1992 (1 year, 335 obs.)

Private (household) dwellings counted by comuna in the 1992 population and housing census (INE, volume Ciudades, Pueblos y Aldeas). Excludes collective dwellings such as hospitals, barracks, and convents, carried in viviendas_colectivas_1992.

Sources: Censo 1992 (INE, Ciudades Pueblos y Aldeas, born-digital)

Rented dwellings (1992)

ID: viviendas_tenencia_arrendada_1992 · Unit: count

Coverage: Comuna: 1992 (1 year, 335 obs.)

Occupied dwellings whose households declared rented tenure, counted by comuna in the 1992 population and housing census (INE, volume Ciudades, Pueblos y Aldeas). Owner-occupied and other tenure forms are carried in the companion tenure indicators.

Sources: Censo 1992 (INE, Ciudades Pueblos y Aldeas, born-digital)

Semi-permanent dwellings (1992)

ID: viviendas_semipermanentes_1992 · Unit: count

Coverage: Comuna: 1992 (1 year, 335 obs.)

Dwellings of semi-permanent construction, such as mejoras and mediaguas, as classified by the census, counted by comuna in the 1992 population and housing census (INE, volume Ciudades, Pueblos y Aldeas). An indicator of precarious housing stock.

Sources: Censo 1992 (INE, Ciudades Pueblos y Aldeas, born-digital)

Population & Labor

Total Population

ID: `total_population` · Unit: persons

Coverage: National: 1835-1990 (152 years, 152 obs.) · Province: 1835-1970 (17 years, 352 obs.) · Department: 1835-1878 (8 years, 274 obs.) · Comuna: 1935-1992 (3 years, 811 obs.)

Total population of the unit (national, province, or department), the canonical population indicator at each of the three scales. The national series draws; the subnational series stitch together census enumerations (1865, 1875, 1885, 1895, 1907, 1920, 1930, 1940, 1952, 1960, 1970, 1982, 1992), Mamalakis (1980) intercensal estimates, and Véjares department-level extraction. Per the duplicate-resolution memo, the `totalpop`, `poblacion_total_titled_dept`, and `poblacion_extended` entries fold into this canonical.

Santiago.

Female labor force

ID: `female_labor_force` · Unit: persons

Coverage: National: 1810-1990 (181 years, 181 obs.)

Total female labor force (women employed plus women unemployed and seeking work). The 1976 ENE redefinition affects comparability across that year; see break-annotation register.

Unit note: Unit field currently blank; should read 'persons'.

Note: methodological break at the 1976 regionalization.

Sources: Censos de Población de Chile (Oficina Central de Estadística, Dirección General de Estadística e Instituto Nacional de Estadísticas), various census years.

Female labor force participation rate

ID: `female_labor_force_participation_rate` · Unit: %

Coverage: National: 1810-1990 (181 years, 181 obs.)

Female labor force as a percentage of working-age female population. The Chilean female participation rate was low by international standards through the 20th century; rose sharply after 1980.

Note: methodological break at the 1976 regionalization.

Sources: Censos de Población de Chile (Oficina Central de Estadística, Dirección General de Estadística e Instituto Nacional de Estadísticas), various census years.

Labor Participation Rate

ID: `labor_participation_rate` · Unit: %

Coverage: National: 1810-1990 (181 years, 181 obs.)

Total labor force as a percentage of working-age population (both sexes).

Note: methodological break at the 1976 regionalization.

Sources: Censos de Población de Chile (Oficina Central de Estadística, Dirección General de Estadística e Instituto Nacional de Estadísticas), various census years.

Labour force, total

ID: `labor_force_total` · Unit: workers

Coverage: National: 1810-1990 (181 years, 181 obs.)

Total national labour force.

Sources: Censos de Población de Chile (Oficina Central de Estadística, Dirección General de Estadística e Instituto Nacional de Estadísticas), various census years.

Male labor force

ID: male_labor_force · Unit: persons

Coverage: National: 1810-1990 (181 years, 181 obs.)

Total male labor force.

Unit note: Unit field currently blank; should read 'persons'.

Note: methodological break at the 1976 regionalization.

Sources: *Censos de Población de Chile (Oficina Central de Estadística, Dirección General de Estadística e Instituto Nacional de Estadísticas)*, various census years.

Male labor force participation rate

ID: male_labor_force_participation_rate · Unit: %

Coverage: National: 1810-1990 (181 years, 181 obs.)

Male labor force as a percentage of working-age male population.

Note: methodological break at the 1976 regionalization.

Sources: *Censos de Población de Chile (Oficina Central de Estadística, Dirección General de Estadística e Instituto Nacional de Estadísticas)*, various census years.

Total Labor Force

ID: total_labor_force · Unit: persons

Coverage: National: 1810-1990 (181 years, 181 obs.)

Total labor force (male + female, employed + unemployed).

Unit note: Unit field currently blank; should read 'persons'.

Note: methodological break at the 1976 regionalization.

Sources: *Censos de Población de Chile (Oficina Central de Estadística, Dirección General de Estadística e Instituto Nacional de Estadísticas)*, various census years.

Unemployed labor force

ID: unemployed_labor_force · Unit: persons

Coverage: National: 1810-1990 (181 years, 181 obs.)

Number of persons unemployed and seeking work. The 1976 ENE redefinition and the 1981-1985 PEM/POJH emergency-employment programs disrupt comparability; the series should be read with the break-annotation register active.

Unit note: Unit field currently blank; should read 'persons'.

Note: methodological break at the 1976 regionalization.

Sources: *Censos de Población de Chile (Oficina Central de Estadística, Dirección General de Estadística e Instituto Nacional de Estadísticas)*, various census years.

Average real income

ID: real_income_nat · Unit: index

Coverage: National: 1960-1983 (24 years, 24 obs.)

Average real income of Chilean workers, 1960-1983, from the sectoral real-income series.

Sources: Mamalakis, Markos. 1980. *Historical Statistics of Chile, Volume 2: Demography and Labor Force*. Westport, CT: Greenwood Press.

Total labour force (quarterly survey)

ID: labor_force_quarterly_nat · Unit: persons

Coverage: National: 1956-1978 (23 years, 23 obs.)

Total labour force recorded in the quarterly labour surveys, averaged to an annual figure.

Sources: Mamalakis, Markos. 1980. *Historical Statistics of Chile, Volume 2: Demography and Labor Force*. Westport, CT: Greenwood Press.

Average registered monthly wage

ID: wages_total_nat · Unit: pesos

Coverage: National: 1944-1976 (19 years, 19 obs.)

Average registered monthly wage across all sectors, 1944-1976, from the sectoral wage series.

Sources: Mamalakis, Markos. 1980. *Historical Statistics of Chile, Volume 2: Demography and Labor Force*. Westport, CT: Greenwood Press.

Economically active population

ID: active_population_nat · Unit: thousands of persons

Coverage: National: 1960-1978 (19 years, 19 obs.)

Total economically active population of Chile, 1960-1978, from the national labour-force series.

Sources: Mamalakis, Markos. 1980. *Historical Statistics of Chile, Volume 2: Demography and Labor Force*. Westport, CT: Greenwood Press.

Total unemployment (quarterly survey)

ID: unemployment_total_nat · Unit: persons

Coverage: National: 1959-1978 (14 years, 14 obs.)

Total joblessness recorded in the quarterly labour surveys, averaged to an annual figure.

Sources: Mamalakis, Markos. 1980. *Historical Statistics of Chile, Volume 2: Demography and Labor Force*. Westport, CT: Greenwood Press.

Manual workers as a share of the employed

ID: labor_obreros_share_nat · Unit: %

Coverage: National: 1960-1970 (11 years, 11 obs.)

Manual workers (obreros) as a share of the employed population, 1960-1970, from the extended labour-force participation series.

Sources: Censos de Población de Chile (Oficina Central de Estadística, Dirección General de Estadística e Instituto Nacional de Estadísticas), various census years.

Politics

Enfranchised peasants

ID: `enfranchised_peasant` · Unit: persons

Coverage: Department: 1862-1920 (3 years, 190 obs.)

Number of enfranchised voters classified as agricultural workers (peasants) in the same department, from the *Anuario Estadístico de Chile 1920*. A sub-component of total enfranchised used in the Landholding paper.

Note: sparse observations; published for research use only.

Sources: *Oficina Central de Estadística. 1921. Anuario Estadístico de la República de Chile, año 1920. Santiago.; Oficina Central de Estadística. 1863. Anuario Estadístico de la República de Chile, año 1862 (Tomo III). Santiago: Imprenta Nacional.; Oficina Central de Estadística. 1873. Anuario Estadístico de la República de Chile, año 1872. Santiago: Imprenta Nacional.*

Enfranchised population total

ID: `enfranchised_totalpop` · Unit: persons

Coverage: Department: 1862-1920 (3 years, 190 obs.)

Total enfranchised population (calificados) by department, parallel to enfranchised but drawn from the *Anuario 1920* retrospective rather than the Véjares working dataset; values may differ slightly across the two compilations.

Note: sparse observations; published for research use only.

Sources: *Oficina Central de Estadística. 1921. Anuario Estadístico de la República de Chile, año 1920. Santiago.; Oficina Central de Estadística. 1873. Anuario Estadístico de la República de Chile, año 1872. Santiago: Imprenta Nacional.; Oficina Central de Estadística. 1863. Anuario Estadístico de la República de Chile, año 1862 (Tomo III). Santiago: Imprenta Nacional.*

Active legislators

ID: `n_legislators` · Unit: legislators

Coverage: Department: 1865-1885 (3 years, 137 obs.)

Number of legislators (diputados plus senadores) representing the department, Biblioteca del Congreso Nacional database. The 19th-century Chilean Congress had a small number of legislators per electoral district; counts of one or two were typical.

Sources: *Biblioteca del Congreso Nacional de Chile. Reseñas Biográficas Parlamentarias. Santiago: BCN. [database].*

Hacendado legislators

ID: `n_hacendados_legs` · Unit: legislators

Coverage: Department: 1865-1885 (3 years, 137 obs.)

Number of legislators representing the department who were classified as hacendados (large landowners) by occupation, source attribution incomplete in the manifest. A direct measure of landlord representation in the 19th-century Congress and a core variable in the Landholding paper's argument.

Note: source attribution incomplete.

Sources: *Véjares, Maximiliano. Forthcoming. Department-level historical dataset, Chile, 19th century (legislator-landowner linkage). Net Zero Industrial Policy Lab, Johns Hopkins University.*

Municipal-election votes cast

ID: `votos_municipales_1870_dept` · Unit: votes

Coverage: Department: 1870 (1 year, 54 obs.)

Votes cast in the 1870 municipal elections by department, from the censo electoral of the *Anuario 1871*.

Unit note: 1870

Sources: *Oficina Central de Estadística. 1872. Anuario Estadístico de la República de Chile, año 1871. Santiago: Imprenta Nacional.*

Qualified voters

ID: `calificados_1869_dept` · Unit: voters

Coverage: Department: 1869 (1 year, 54 obs.)

Citizens entered on the 1869 electoral roll (*ciudadanos calificados*) by department, from the censo electoral of the *Anuario 1871*.

Unit note: 1869 roll

Sources: *Oficina Central de Estadística. 1872. Anuario Estadístico de la República de Chile, año 1871. Santiago: Imprenta Nacional.*

Presidential-elect votes cast

ID: `votos_presidente_1871_dept` · Unit: votes

Coverage: Department: 1871 (1 year, 53 obs.)

Votes cast for presidential electors in the 1871 election by department, from the censo electoral of the *Anuario 1871*.

Unit note: 1871

Sources: *Oficina Central de Estadística. 1872. Anuario Estadístico de la República de Chile, año 1871. Santiago: Imprenta Nacional.*

Max terms, single legislator (1833-1891)

ID: `max_terms_single_legislator_1833_1891` · Unit: terms

Coverage: Department: 1874 (1 year, 29 obs.)

For each department, the maximum number of consecutive congressional terms served by any single legislator over the 1833-1891 period. Computed from the Biblioteca del Congreso Nacional database. A single observation per department (not a time series): the manifest currently records it under year 1874 as a placeholder.

Note: single-year cross-section; published for research use only.

Sources: *Biblioteca del Congreso Nacional de Chile. Reseñas Biográficas Parlamentarias, 1833-1891. Santiago: BCN. [database].*

Surname persistence in legislature (1833-1891)

ID: `legislator_surname_persistence_1833_1891` · Unit: index (0-1)

Coverage: Department: 1874 (1 year, 29 obs.)

For each department, a measure of surname persistence among legislators across the 1833-1891 period (the share of legislator-years held by repeating surnames). Single observation per department; placeholder year 1874.

Note: single-year cross-section; published for research use only.

Sources: *Biblioteca del Congreso Nacional de Chile. Reseñas Biográficas Parlamentarias, 1833-1891. Santiago: BCN. [database].*

Unique legislator surnames (1833-1891)

ID: `n_unique_legislator_surnames_1833_1891` · Unit: surnames

Coverage: Department: 1874 (1 year, 29 obs.)

Number of distinct surnames among legislators representing the department over the 1833-1891 period. Single observation per department; placeholder year 1874.

Note: single-year cross-section; published for research use only.

Sources: *Biblioteca del Congreso Nacional de Chile. Reseñas Biográficas Parlamentarias, 1833-1891. Santiago: BCN. [database].*

Unique legislators (1833-1891)

ID: `n_unique_legislators_1833_1891` · Unit: legislators

Coverage: Department: 1874 (1 year, 29 obs.)

Number of distinct individuals who served as legislators representing the department over the 1833-1891 period. Single observation per department; placeholder year 1874. The ratio of `n_unique_legislator_surnames_1833_1891` to this indicator measures how concentrated legislator turnover was within elite families.

Note: single-year cross-section; published for research use only.

Sources: *Biblioteca del Congreso Nacional de Chile. Reseñas Biográficas Parlamentarias, 1833-1891. Santiago: BCN. [database].*

Deputies

ID: `diputados_1920_prov` · Unit: deputies

Coverage: Province: 1920 (1 year, 23 obs.)

Deputies apportioned to each province in 1920, from the Anuario 1917/1920 legislative tables.

Unit note: 1920

Sources: *Dirección General de Estadística. 1927. Sinopsis Estadística de Chile, 1924-1927, p. 39. Santiago.*

Senators

ID: `senadores_1920_prov` · Unit: senators

Coverage: Province: 1920 (1 year, 23 obs.)

Senators apportioned to each province in 1920, from the Anuario 1917/1920 legislative tables.

Unit note: 1920

Sources: *Dirección General de Estadística. 1927. Sinopsis Estadística de Chile, 1924-1927, p. 39. Santiago.*

Public finance

Municipal income (1935)

ID: income · Unit: count

Coverage: Comuna: 1935 (1 year, 271 obs.)

Total municipal revenue by comuna, in nominal pesos, for 1935, from the curated research assembly regime-state 1935.xlsx, the author's compilation of official mid-1930s comuna statistics. The assembly carries no page-level citation, so the series documents a compilation rather than a direct extraction. A single-year cross-section; taxincome and salaries carry the tax-revenue and salary-spending components.

Sources: Véjares, Maximiliano. Forthcoming. *Compiled state-capacity dataset, Chile, 1935*. Net Zero Industrial Policy Lab, Johns Hopkins University.

Municipal salaries (1935)

ID: salaries · Unit: count

Coverage: Comuna: 1935 (1 year, 271 obs.)

Municipal spending on salaries by comuna, in nominal pesos, for 1935, from the curated research assembly regime-state 1935.xlsx, the author's compilation of official mid-1930s comuna statistics. The assembly carries no page-level citation, so the series documents a compilation rather than a direct extraction. A single-year cross-section.

Sources: Véjares, Maximiliano. Forthcoming. *Compiled state-capacity dataset, Chile, 1935*. Net Zero Industrial Policy Lab, Johns Hopkins University.

Municipal tax income (1935)

ID: taxincome · Unit: count

Coverage: Comuna: 1935 (1 year, 271 obs.)

Municipal revenue raised through local taxation by comuna, in nominal pesos, for 1935, from the curated research assembly regime-state 1935.xlsx, the author's compilation of official mid-1930s comuna statistics. The assembly carries no page-level citation, so the series documents a compilation rather than a direct extraction. A component of income; the ratio of the two measures local fiscal effort.

Sources: Véjares, Maximiliano. Forthcoming. *Compiled state-capacity dataset, Chile, 1935*. Net Zero Industrial Policy Lab, Johns Hopkins University.

Municipal expenditure (department)

ID: municipal_salidas_dept · Unit: pesos

Coverage: Department: 1877-1889 (2 years, 113 obs.)

Municipal expenditure aggregated to the department, from the municipal-finance tables of the Memorias del Interior (1877, 1889). 1889 combines the alcalde and gobernador expenditure lines.

Sources: Ministerio del Interior. 1891. *Memoria del Ministerio del Interior presentada al Congreso Nacional, año 1890*, Tomo I. Santiago.; Ministerio del Interior. 1878. *Memoria del Ministerio del Interior presentada al Congreso Nacional, año 1877*. Santiago.

Business licences issued

ID: patentes_prov · Unit: patentes

Coverage: Province: 1852-1858 (7 years, 91 obs.)

Commercial licences (patentes) issued by province, 1852-1858, from the Memoria de Hacienda fiscal tables. A proxy for the formal commercial economy.

Unit note: 1852-1858

Sources: Oficina Central de Estadística. 1860-1872. *Anuario Estadístico de la República de Chile, Tomos I-XIII*. Santiago: Imprenta Nacional. (2012 reissue: Instituto Nacional de Estadísticas.)

Bankruptcies declared (province)

ID: bankruptcies_prov · Unit: bankruptcies

Coverage: Province: 1933-1935 (3 years, 57 obs.)

Bankruptcies (quiebras) declared by province, 1933-1935, from the Anuario 1935 commercial statistics.

Sources: Dirección General de Estadística. 1936. *Anuario Estadístico de Chile, año 1935*. Santiago.

Land tax assessed (department)

ID: land_tax_dept · Unit: pesos

Coverage: Department: 1856 (1 year, 46 obs.)

Territorial (land) tax assessed by department, from the contribución territorial rolls.

Sources: Ministerio de Hacienda. 1857. *Memoria de Hacienda presentada al Congreso Nacional, año 1856*. Santiago.

Budgeted administrative posts, Interior (1890-1896)

ID: pres_int_n_posts · Unit: count

Coverage: Province: 1894 (1 year, 2 obs.) · Department: 1890-1895 (5 years, 28 obs.)

Number of budgeted posts (plazas) in the territorial administration, from the annual Lei de Presupuestos of the Ministerio del Interior, 1890-1896. These are authorized appropriations for the territorial administration (intendencias and gobernaciones), not executed spending.

Sources: Lei de Presupuestos 1890, Ministerio del Interior; Lei de Presupuestos 1893, Ministerio del Interior; Lei de Presupuestos 1894, Ministerio del Interior; Lei de Presupuestos 1895, Ministerio del Interior; and 1 further sources

Budgeted operating expenses, Interior administration (1890-1896)

ID: pres_int_operativos_pesos · Unit: pesos

Coverage: Province: 1894 (1 year, 2 obs.) · Department: 1890-1895 (5 years, 28 obs.)

Operating-expense appropriations (gastos variables) in nominal pesos for the territorial administration, from the annual Lei de Presupuestos of the Ministerio del Interior, 1890-1896. These are authorized appropriations for the territorial administration (intendencias and gobernaciones), not executed spending.

Sources: Lei de Presupuestos 1890, Ministerio del Interior; Lei de Presupuestos 1893, Ministerio del Interior; Lei de Presupuestos 1894, Ministerio del Interior; Lei de Presupuestos 1895, Ministerio del Interior; and 1 further sources

Budgeted salaries, Interior administration (1890-1896)

ID: pres_int_sueldos_pesos · Unit: pesos

Coverage: Province: 1894 (1 year, 2 obs.) · Department: 1890-1895 (5 years, 28 obs.)

Salary appropriations (sueldos fijos) in nominal pesos for the territorial administration, from the annual Lei de Presupuestos of the Ministerio del Interior, 1890-1896. These are authorized appropriations for the territorial administration (intendencias and gobernaciones), not executed spending.

Sources: Lei de Presupuestos 1890, Ministerio del Interior; Lei de Presupuestos 1893, Ministerio del Interior; Lei de Presupuestos 1894, Ministerio del Interior; Lei de Presupuestos 1895, Ministerio del Interior; and 1 further sources

Bank offices (province)

ID: bank_offices_prov · Unit: offices

Coverage: Province: 1935 (1 year, 19 obs.)

Total commercial and savings bank offices by province.

Sources: Dirección General de Estadística. 1936. *Anuario Estadístico de Chile, año 1935*. Santiago.

Infrastructure

Postal printed matter handled (department)

ID: correos_impresos_dept · Unit: items

Coverage: Department: 1876-1886 (7 years, 440 obs.)

Printed items (newspapers, circulars, official print) handled by departmental post offices, Memorias del Interior 1876-1886.

Sources: Ministerio del Interior. 1888. Memoria del Ministerio del Interior presentada al Congreso Nacional, año 1887. Santiago.; Ministerio del Interior. 1884. Memoria del Ministerio del Interior presentada al Congreso Nacional, año 1883. Santiago.; Ministerio del Interior. 1879. Memoria del Ministerio del Interior presentada al Congreso Nacional, año 1878. Santiago.; Ministerio del Interior. 1880. Memoria del Ministerio del Interior presentada al Congreso Nacional, año 1879. Santiago.

Postal letters handled (department)

ID: correos_cartas_dept · Unit: letters

Coverage: Department: 1876-1882 (5 years, 302 obs.)

Letters dispatched through departmental post offices, from the correspondence tables of the Memorias del Interior, 1876-1882. A proxy for the reach of the postal network and of literate administrative activity.

Sources: Ministerio del Interior. 1884. Memoria del Ministerio del Interior presentada al Congreso Nacional, año 1883. Santiago.; Ministerio del Interior. 1879. Memoria del Ministerio del Interior presentada al Congreso Nacional, año 1878. Santiago.; Ministerio del Interior. 1880. Memoria del Ministerio del Interior presentada al Congreso Nacional, año 1879. Santiago.

State-owned railway length

ID: state_owned_railway_length · Unit: kilometers

Coverage: National: 1876-1990 (109 years, 109 obs.)

Total kilometers of state-owned railway track. The state railway operator (Empresa de los Ferrocarriles del Estado, EFE, founded 1884) became dominant in the central and southern Chilean network; the series shows its expansion through the 20th century and contraction after 1990.

Private railway length

ID: private_railway_length · Unit: kilometers

Coverage: National: 1876-1987 (98 years, 98 obs.)

Total kilometers of privately-owned railway track in Chile. The complement to state_owned_railway_length. The 19th-century railway buildout was a mix of private (mining and agricultural) and state-promoted lines; the 1884 nationalization of the central trunk reshaped the balance.

Air passenger movement

ID: air_passenger_movement · Unit: passengers

Coverage: National: 1890-1990 (92 years, 92 obs.)

Annual air-passenger movements through Chilean airports. Pre-1930 figures are zero or near-zero (commercial aviation began in 1929 with LAN's predecessor); the series captures the post-1930 development.

Unit note: Unit field currently blank; should read 'passengers'.

Note: sparse early observations.

Post offices (department)

ID: post_offices_dept · Unit: offices

Coverage: Department: 1865-1875 (2 years, 85 obs.)

Count of post offices by department in 1865 and 1875, from the Memorias del Interior postal registers.

Sources: Vélazquez, Maximiliano. Forthcoming. Department-level historical dataset, Chile, 19th century. Compiled from primary archival sources. Net Zero Industrial Policy Lab, Johns Hopkins University.

Telephones in service

ID: `telephones_in_service` · Unit: telephones

Coverage: National: 1868-1990 (85 years, 85 obs.)

Number of telephones in service in Chile. The series begins implausibly early (1868); the first commercial telephone service in Chile started in 1879. Pre-1879 figures should be read with skepticism or are likely encoding errors.

Unit note: Unit field currently blank; should read 'telephones'.

Note: anomalous early values.

Railway network length

ID: `railway_network_length` · Unit: kilometers

Coverage: National: 1890-1987 (51 years, 51 obs.)

Total kilometers of railway track (private + state). The sum of `private_railway_length` and `state_owned_railway_length`; the indicator most directly useful for tracking the overall railway network's geographic extent.

Sources: Dirección General de Estadística. 1936. *Anuario Estadístico de Chile, año 1935, Tabla 36*. Santiago.

Dwellings

ID: `viviendas_nat` · Unit: dwellings

Coverage: National: 1952-1990 (32 years, 32 obs.)

Number of dwellings recorded in the construction and housing series, 1952-1990.

Sources: *Censos de Población y Vivienda de Chile* (Dirección General de Estadística e Instituto Nacional de Estadísticas), various census years.

Land Structure

Manorial treatment

ID: `manorial_treatment` · Unit: 0/1 indicator

Coverage: Department: 1874 (1 year, 50 obs.)

Indicator of whether a department was characterized by the manorial latifundio system in 1874, after Bauer (1975), Chilean Rural Society. A single-year cross-section used as a treatment variable in the Landholding paper. The specific coding scheme should be documented in the source paper.

Unit note: 1874

Note: single-year cross-section.

Sources: Bauer, Arnold J. 1975. *Chilean Rural Society from the Spanish Conquest to 1930*. Cambridge: Cambridge University Press.

SNA estate mean price

ID: `sna_estate_price_mean_1874` · Unit: current pesos

Coverage: Department: 1874 (1 year, 50 obs.)

Mean sale price of estates listed in the Boletín de la Sociedad Nacional de Agricultura, Volume VI (1874), by department. A single-year cross-section. The SNA listings provided market valuations distinct from the official catastro avalúos.

Unit note: 1874

Note: single-year cross-section.

Sources: Sociedad Nacional de Agricultura. 1874. *Boletín de la Sociedad Nacional de Agricultura, Volume VI*. Santiago.

SNA-listed estates

ID: `sna_estate_count_1874` · Unit: estates

Coverage: Department: 1874 (1 year, 50 obs.)

Count of estates listed for sale in the Boletín de la Sociedad Nacional de Agricultura, Volume VI (1874), by department. A single-year cross-section. Captures the level of land-market activity by region in 1874.

Unit note: count of estates (raw count)

Note: single-year cross-section.

Sources: Sociedad Nacional de Agricultura. 1874. *Boletín de la Sociedad Nacional de Agricultura, Volume VI*. Santiago.

Landowners

ID: `n_landowners_1875_dept` · Unit: landowners

Coverage: Department: 1875 (1 year, 49 obs.)

Count of registered landowners by department in 1875, from the territorial-tax rolls. Read against departmental area and population it indexes the dispersion of landholding across the central valley and frontier.

Unit note: 1875

Sources: Ministerio de Hacienda. 1876. *Rol de Contribuyentes de la República de Chile, 1875*. Santiago.

Catastro avalúo

ID: `avaluo_total_1874` · Unit: current pesos

Coverage: Department: 1874 (1 year, 47 obs.)

Total appraised value of taxable real property by department, from the Catastro de Avalúos de la República de Chile 1874. The denominator for the 1874 land-tax-base indicators; a single-year cross-section, not a time series.

Note: single-year cross-section; published for research use only.

Sources: Ministerio de Hacienda. 1875. *Catastro de Avalúos de la República de Chile, 1874*. Santiago.

Gini of avalúos

ID: gini_avaluo_1874 · Unit: Gini coefficient (0-1)

Coverage: Department: 1874 (1 year, 38 obs.)

Gini coefficient of property appraised values within each department, computed from the Rol de Avalúos 1874. A single-year cross-section. The indicator captures within-department inequality in landownership at one moment in 1874; values closer to 1 indicate higher concentration.

Note: single-year cross-section; published for research use only.

Sources: Ministerio de Hacienda. 1875. *Rol de Avalúos de la República de Chile, 1874, departmental returns*. Santiago.

Taxpayers in Rol

ID: n_taxpayers_rol_1874 · Unit: taxpayers

Coverage: Department: 1874 (1 year, 38 obs.)

Number of distinct taxpayers listed in the Rol de Avalúos 1874, by department. A single-year cross-section. The numerator for measures of landownership concentration (when divided by total department population or by adult male population).

Note: single-year cross-section; published for research use only.

Sources: Ministerio de Hacienda. 1875. *Rol de Avalúos de la República de Chile, 1874, departmental returns*. Santiago.

Top 5 avalúo share

ID: top5_avaluo_share_1874 · Unit: %

Coverage: Department: 1874 (1 year, 38 obs.)

Share of total department appraised value held by the top 5% of property owners (by avalúo), Rol de Avalúos 1874. A single-year cross-section. A direct concentration measure complementing the Gini.

Note: single-year cross-section; published for research use only.

Sources: Ministerio de Hacienda. 1875. *Rol de Avalúos de la República de Chile, 1874, departmental returns*. Santiago.

Total avalúo Rol

ID: total_avaluo_rol_1874 · Unit: current pesos

Coverage: Department: 1874 (1 year, 38 obs.)

Sum of avalúos listed in the Rol de Avalúos 1874, by department. A single-year cross-section. Conceptually similar to avaluo_total_1874 but drawn from the rol rather than the catastro; the two figures may differ where the rol omits or differently treats marginal taxpayers.

Note: single-year cross-section; published for research use only.

Sources: Ministerio de Hacienda. 1875. *Rol de Avalúos de la República de Chile, 1874, departmental returns*. Santiago.

Occupations

Agricultural workers (rural laborers)

ID: peasant · Unit: persons

Coverage: Department: 1862-1920 (10 years, 648 obs.)

Department-level count of agricultural workers (the 19th-century Chilean rural laborer occupations: peón, inquilino, gañán, jornalero), Vélazquez department-level historical dataset. The 'peasant' label is editorially loaded; per the duplicate-resolution memo, this indicator is scheduled to merge into a renamed agricultural_workers_department. The historiographical debate over what to call this class is documented in Bauer (1975) and Bengoa (2015).

Unit note: Unit field currently blank; should read 'persons' or 'workers'.

Note: scheduled for rename.

Sources: Vélazquez, Maximiliano. Forthcoming. Department-level historical dataset, Chile, 19th century. Compiled from primary archival sources. Net Zero Industrial Policy Lab, Johns Hopkins University.; Dirección General de Estadística. 1918. Anuario Estadístico de la República de Chile, año 1917, enfranchisement section. Santiago.

Public employees

ID: pubemp · Unit: employees

Coverage: Province: 1865-1920 (6 years, 84 obs.) · Department: 1865-1920 (6 years, 433 obs.)

Count of public employees (all branches and levels of government) at department or province scale, Vélazquez department-level historical dataset. The aggregate corresponding to the specific governance-presence indicators (pres_has_gobernador, pres_has_juez, pres_has_reg_civil).

Unit note: Unit field currently blank; should read 'persons'.

Sources: Vélazquez, Maximiliano. Forthcoming. Department-level historical dataset, Chile, 19th century. Compiled from primary archival sources. Net Zero Industrial Policy Lab, Johns Hopkins University.; Vélazquez, Maximiliano. Forthcoming. Compiled public-employment series, Chile. Net Zero Industrial Policy Lab, Johns Hopkins University.; Oficina Central de Estadística. 1925. X Censo de la Población de la República de Chile, 15 de diciembre de 1920, public employees by theme. Santiago.

Engineers

ID: engineers · Unit: persons

Coverage: Department: 1865-1920 (6 years, 430 obs.)

Department-level count of persons reporting 'ingeniero' (engineer) as their occupation in the 1865-1920 censuses, Vélazquez department-level historical dataset. A small but informative measure of technical professions and the geographic distribution of the modernizing middle class.

Unit note: Unit field currently blank; should read 'persons'.

Sources: Vélazquez, Maximiliano. Forthcoming. Department-level historical dataset, Chile, 19th century. Compiled from primary archival sources. Net Zero Industrial Policy Lab, Johns Hopkins University.

Lawyers

ID: lawyer · Unit: persons

Coverage: Department: 1865-1920 (6 years, 430 obs.)

Department-level count of persons reporting 'abogado' (lawyer) as their occupation in the 1865-1920 censuses, Vélazquez department-level historical dataset. A measure of the legal-administrative profession; lawyers were highly concentrated in Santiago and Valparaíso.

Unit note: Unit field currently blank; should read 'persons'.

Sources: Vélazquez, Maximiliano. Forthcoming. Department-level historical dataset, Chile, 19th century. Compiled from primary archival sources. Net Zero Industrial Policy Lab, Johns Hopkins University.

Military Personnel

ID: military · Unit: persons

Coverage: Department: 1865-1920 (6 years, 430 obs.)

Department-level count of persons reporting military occupations (oficial, soldado, marino) in the 1865-1920 censuses, Véljares department-level historical dataset. Concentrated in garrison towns (Santiago, Valparaíso, Concepción, post-WoP northern departments).

Unit note: persons

Sources: Véljares, Maximiliano. Forthcoming. Department-level historical dataset, Chile, 19th century. Compiled from primary archival sources. Net Zero Industrial Policy Lab, Johns Hopkins University.

Teachers

ID: teacher · Unit: teachers

Coverage: Department: 1875-1920 (5 years, 376 obs.)

Department-level count of persons reporting teaching occupations (preceptor, profesor, maestra) in the 1875-1920 censuses, Véljares department-level historical dataset. Reflects the buildout of the primary-education system under the 1860 Ley de Instrucción Primaria.

Unit note: Unit field currently blank; should read 'persons'.

Sources: Véljares, Maximiliano. Forthcoming. Department-level historical dataset, Chile, 19th century. Compiled from primary archival sources. Net Zero Industrial Policy Lab, Johns Hopkins University.

Police officers

ID: police · Unit: officers

Coverage: Department: 1895-1920 (3 years, 242 obs.)

Department-level count of persons reporting police occupations in the 1895-1920 censuses, Véljares department-level historical dataset. The pre-Carabineros (1927) era included municipal police, departmental policía de seguridad, and gendarmes; the census occupation code aggregates them.

Unit note: Unit field currently blank; should read 'persons'.

Sources: Véljares, Maximiliano. Forthcoming. Department-level historical dataset, Chile, 19th century. Compiled from primary archival sources. Net Zero Industrial Policy Lab, Johns Hopkins University.

Agricultural workers (1920 census)

ID: occ_agricultura_1920_dept · Unit: workers

Coverage: Department: 1920 (1 year, 38 obs.)

Persons recorded in agricultural occupations by department at the 1920 census, from the occupational-category tabulation. A measure of the rural labour force on the eve of Chile's interwar urbanisation.

Unit note: 1920

Sources: Oficina Central de Estadística. 1925. X Censo de la Población de la República de Chile, 15 de diciembre de 1920. Santiago.

Farmers

ID: occ_agricultores_1875_prov · Unit: men

Coverage: Province: 1875 (1 year, 18 obs.)

Men recorded as farmers (agricultores) by province at the 1875 census, the largest single occupational category and a proxy for the agrarian labour force.

Unit note: 1875

Sources: Oficina Central de Estadística. 1876. Quinto Censo Jeneral de la Población de Chile, 1875. Santiago: Imprenta Nacional.

Public health

Smallpox vaccinations (department)

ID: vacunados_dept · Unit: persons vaccinated

Coverage: Department: 1862-1889 (3 years, 136 obs.)

Persons vaccinated against smallpox in each department, from the vaccination returns of the Memorias del Interior (1862, 1886, 1889). A measure of public-health state capacity in the 19th century.

Sources: Ministerio del Interior. 1891. *Memoria del Ministerio del Interior presentada al Congreso Nacional, año 1890, Tomo I. Santiago.*; Ministerio del Interior. 1888. *Memoria del Ministerio del Interior presentada al Congreso Nacional, año 1887. Santiago.*; Ministerio del Interior. 1863. *Memoria del Ministerio del Interior presentada al Congreso Nacional, año 1862. Santiago.*

Hospitals (department)

ID: hospitals_count_dept · Unit: hospitals

Coverage: Department: 1930-1940 (2 years, 104 obs.)

Count of hospitals by department around 1930-1940, from the Anuario hospital registers.

Sources: Véjares, Maximiliano. *Forthcoming. Department-level historical dataset, Chile, 19th century. Compiled from primary archival sources. Net Zero Industrial Policy Lab, Johns Hopkins University.*

Smallpox deaths (department)

ID: viruela_defunciones_dept · Unit: deaths

Coverage: Department: 1886-1889 (2 years, 82 obs.)

Deaths attributed to smallpox by department, recorded in the Memorias del Interior epidemic returns (1886, 1889).

Sources: Ministerio del Interior. 1888. *Memoria del Ministerio del Interior presentada al Congreso Nacional, año 1887. Santiago.*; Ministerio del Interior. 1891. *Memoria del Ministerio del Interior presentada al Congreso Nacional, año 1890, Tomo I. Santiago.*

Smallpox vaccine distributed

ID: virus_repartido_dept · Unit: doses

Coverage: Department: 1889 (1 year, 70 obs.)

Smallpox vaccine (cowpox 'virus') distributed to each department in 1889, from the Reparto de Virus table of the Memoria del Interior 1890.

Unit note: 1889

Sources: Ministerio del Interior. 1891. *Memoria del Ministerio del Interior presentada al Congreso Nacional, año 1890, Tomo I. Santiago.*

Hospital admissions

ID: hospital_admissions_prov · Unit: admissions

Coverage: Province: 1924 (1 year, 24 obs.)

Hospital admissions by province in 1924, from the Anuario hospital-movement tables.

Unit note: 1924

Sources: Dirección General de Estadística. 1927. *Sinopsis Estadística de Chile, 1924-1927. Santiago.*

Hospital beds

ID: hospital_beds_prov · Unit: beds

Coverage: Province: 1924 (1 year, 24 obs.)

Hospital bed capacity by province in 1924, from the Anuario hospital-movement tables.

Unit note: 1924

Sources: Dirección General de Estadística. 1927. *Sinopsis Estadística de Chile, 1924-1927. Santiago.*

Hospitals (province)

ID: hospitals_count_prov · Unit: hospitals

Coverage: Province: 1924 (1 year, 24 obs.)

Count of hospitals by province in 1924, from the Anuario hospital registers.

Sources: Dirección General de Estadística. 1927. *Sinopsis Estadística de Chile, 1924-1927*. Santiago.; Dirección General de Estadística. 1927. *Sinopsis Estadística de Chile, 1924-1927*, p. 55. Santiago.

Real social expenditure

ID: social_spending_real_nat · Unit: index

Coverage: National: 1960-1983 (24 years, 24 obs.)

Real social expenditure of the state, 1960-1983, from the social-spending series.

Sources: Memoria del Ministerio de Hacienda and Dirección de Presupuestos y Contraloría General de la República, *Cuenta de la Inversión / Cálculo de Entradas y Gastos*, various years.

Child malnutrition rate

ID: desnutricion_total_nat · Unit: %

Coverage: National: 1975-1983 (9 years, 9 obs.)

Share of children recorded as malnourished, 1975-1983, from the public-health malnutrition series.

Sources: Véjares, Maximiliano. *Forthcoming. Compiled historical dataset, Chile, pre-1973, multi-source*. Net Zero Industrial Policy Lab, Johns Hopkins University.

Justice

Persons arrested

ID: reos_aprehendidos_prov · Unit: persons

Coverage: Province: 1924-1925 (2 years, 39 obs.)

Persons apprehended by the police by province, 1924-1925, from the Anuario judicial/police statistics.

Unit note: 1924-1925

Sources: Dirección General de Estadística. 1927. *Sinopsis Estadística de Chile, 1924-1927*. Santiago.

Police force (department)

ID: police_force_dept · Unit: officers

Coverage: Department: 1895-1920 (2 years, 26 obs.)

Strength of the police force by department.

Sources: Véjares, Maximiliano. *Forthcoming*. Department-level historical dataset, Chile, 19th century. Compiled from primary archival sources. Net Zero Industrial Policy Lab, Johns Hopkins University.

Court cases filed (province)

ID: court_cases_filed_prov · Unit: cases

Coverage: Province: 1899 (1 year, 24 obs.)

Civil and criminal court cases filed (ingresadas) by province.

Sources: Oficina Central de Estadística. ca. 1858. *Sinopsis Estadística i Jeográfica de la República de Chile*. Santiago: Imprenta Nacional.

Prisoners admitted

ID: reos_entrados_prov · Unit: prisoners

Coverage: Province: 1900 (1 year, 24 obs.)

Prisoners admitted to provincial jails each year 1892-1900, from the Sinopsis Estadística prison series.

Unit note: 1892-1900

Sources: Oficina Central de Estadística. ca. 1858. *Sinopsis Estadística i Jeográfica de la República de Chile*. Santiago: Imprenta Nacional.

Prison admissions

ID: carceles_entrados_1869_prov · Unit: prisoners

Coverage: Province: 1869 (1 year, 14 obs.)

Prisoners admitted to provincial jails in 1869, from the prison-movement table of the Anuario 1871.

Unit note: 1869

Sources: Oficina Central de Estadística. 1872. *Anuario Estadístico de la República de Chile, año 1871*. Santiago: Imprenta Nacional.

Crimes recorded

ID: crimenes_1859_prov · Unit: crimes

Coverage: Province: 1859 (1 year, 13 obs.)

Crimes recorded by province in 1859, summing the male and female totals of the crime-statistics tabulation. An early measure of recorded criminality across the provinces.

Unit note: 1859

Sources: Oficina Central de Estadística. 1861. *Anuario Estadístico de la República de Chile, año 1860 (Tomo I)*. Santiago: Imprenta Nacional.

Minors under state protective control

ID: menores_control_nat · Unit: minors

Coverage: National: 1975-1983 (9 years, 9 obs.)

Minors held under state protective or correctional control, 1975-1983, from the juvenile-justice series.

Sources: Vélazquez, Maximiliano. *Forthcoming. Compiled historical dataset, Chile, pre-1973, multi-source. Net Zero Industrial Policy Lab, Johns Hopkins University.*

Electoral

Enfranchised voters (calificados/inscriptos)

ID: enfranchised · Unit: persons

Coverage: Department: 1862-1921 (15 years, 866 obs.)

Number of enfranchised voters (calificados, the term used in the 19th-century electoral law) by department, Véjares department-level historical dataset. The base for the enfranchised_pc series and the analytical core of the Landholding paper's argument about landlord influence on the 19th-century franchise.

Sources: Véjares, Maximiliano. Forthcoming. Department-level historical dataset, Chile, 19th century. Compiled from primary archival sources. Net Zero Industrial Policy Lab, Johns Hopkins University.; Véjares, Maximiliano. Forthcoming. Landholding and Democracy in Chile. Working paper, Net Zero Industrial Policy Lab, Johns Hopkins University.; Oficina Central de Estadística. 1892. Anuario Estadístico de la República de Chile, Tomo XXVI, años 1887-1888. Santiago: Imprenta Nacional.; Oficina Central de Estadística. ca. 1885. Anuario Estadístico de la República de Chile, Tomo XXIV. Santiago: Imprenta Nacional.; and 1 further sources

Enfranchised voters (1920)

ID: enf1920 · Unit: count

Coverage: Comuna: 1935 (1 year, 268 obs.)

Registered (enfranchised) voters in 1920, keyed to the 1935 commune frame, from the curated research assembly regime-state 1935.xlsx, the author's compilation of official mid-1930s comuna statistics. The assembly carries no page-level citation, so the series documents a compilation rather than a direct extraction drawn from the author's enfranchisement data collection 1862-1920. Comuna values sum to 328,034 nationally, matching the registered electorate of the 1920 election. A single-year cross-section.

Sources: Véjares, Maximiliano. Forthcoming. Compiled state-capacity dataset, Chile, 1935. Net Zero Industrial Policy Lab, Johns Hopkins University.

Rural enfranchisement rate (1920)

ID: enfrural · Unit: %

Coverage: Comuna: 1935 (1 year, 268 obs.)

Rural enfranchisement in 1920 recorded as a small proportion (values below 0.005), keyed to the 1935 commune frame, from the curated research assembly regime-state 1935.xlsx, the author's compilation of official mid-1930s comuna statistics. The assembly carries no page-level citation, so the series documents a compilation rather than a direct extraction. The assembly does not document the denominator of the rate, so the base population is unresolved; use with caution.

Note: unit not fully documented in the source.

Sources: Véjares, Maximiliano. Forthcoming. Compiled state-capacity dataset, Chile, 1935. Net Zero Industrial Policy Lab, Johns Hopkins University.

Sufragantes (votes cast)

ID: sufragantes · Unit: persons

Coverage: Department: 1888-1915 (2 years, 152 obs.)

Number of voters who actually cast ballots in elections, by department, Anuario Estadístico Tomo XXVI and successor volumes. The ratio of sufragantes to register_voters is a measure of electoral participation; the gap between them captures abstention.

Note: sparse observations.

Sources: Dirección del Registro Electoral. 1915. Censo Electoral de la República de Chile, 1915. Santiago.; Oficina Central de Estadística. 1892. Anuario Estadístico de la República de Chile, Tomo XXVI, años 1887-1888. Santiago: Imprenta Nacional.

Registered voters (turnout panel)

ID: register_voters · Unit: persons

Coverage: Department: 1888-1915 (2 years, 100 obs.)

Number of registered voters by department, Anuario Estadístico Tomo XXVI (1887-1888) and successor volumes. After the 1888 electoral reform, the registered-voter count became the operational measure of franchise extension; this series captures the post-1888 era. The pre-1888 calificados figure (enfranchised) is the conceptually closest predecessor.

Note: sparse observations.

Sources: *Oficina Central de Estadística. 1892. Anuario Estadístico de la República de Chile, Tomo XXVI, años 1887-1888.*

Santiago: Imprenta Nacional; Dirección del Registro Electoral. 1915. Censo Electoral de la República de Chile, 1915. Santiago; Véjares, Maximiliano. Forthcoming. Landholding and Democracy in Chile. Working paper, Net Zero Industrial Policy Lab, Johns Hopkins University.

Votes cast in national elections

ID: votantes_nacional · Unit: voters

Coverage: National: 1935-1970 (10 years, 10 obs.)

Votes cast in national elections, 1935-1970, from the electoral-participation series. Read against the registered and voting-age populations it tracks the mid-century expansion of the franchise.

Sources: *Véjares, Maximiliano. Forthcoming. Compiled historical dataset, Chile, pre-1973, multi-source. Net Zero Industrial Policy Lab, Johns Hopkins University.*

Mining

Coal production

ID: `coal_production` · Unit: metric tons

Coverage: National: 1860-1990 (131 years, 131 obs.)

Annual national coal production in metric tons. Chilean coal came primarily from the Arauco and Concepción coalfields; output rose through the 19th-century industrial era, peaked mid-20th century, and declined as cheaper imported coal and natural gas displaced domestic production.

Sources: Oficina Central de Estadística, Dirección General de Estadística e Instituto Nacional de Estadísticas, Anuario Estadístico de Chile (sección Minería), and Sociedad Nacional de Minería, Estadística Minera de Chile, various years.

Copper production

ID: `copper_production` · Unit: metric tons

Coverage: National: 1860-1990 (131 years, 131 obs.)

Annual national copper production in metric tons. Chile was a major world copper producer through the 19th century (the Chuquicamata-era expansion came after 1915 under US Anaconda and Kennecott ownership; the 1971 nationalization placed the major mines under Codelco).

Sources: Oficina Central de Estadística, Dirección General de Estadística e Instituto Nacional de Estadísticas, Anuario Estadístico de Chile (sección Minería), and Sociedad Nacional de Minería, Estadística Minera de Chile, various years.

Gold production

ID: `gold_production` · Unit: kilograms

Coverage: National: 1860-1990 (131 years, 131 obs.)

Annual national gold production in kilograms. Chilean gold output was modest after the colonial era; the series captures occasional rushes (the 1850s Atacama deposits, the 1930s Andacollo expansion) and small-scale persistent production.

Sources: Oficina Central de Estadística, Dirección General de Estadística e Instituto Nacional de Estadísticas, Anuario Estadístico de Chile (sección Minería), and Sociedad Nacional de Minería, Estadística Minera de Chile, various years.

Silver production

ID: `silver_production` · Unit: kilograms

Coverage: National: 1860-1990 (131 years, 131 obs.)

Annual national silver production in kilograms. The major Chilean silver booms (Chañarcillo from 1832, Caracoles from 1870) shaped 19th-century mining geography.

Sources: Oficina Central de Estadística, Dirección General de Estadística e Instituto Nacional de Estadísticas, Anuario Estadístico de Chile (sección Minería), and Sociedad Nacional de Minería, Estadística Minera de Chile, various years.

Sulfur production

ID: `sulfur_production` · Unit: metric tons

Coverage: National: 1887-1975 (79 years, 79 obs.)

Annual national sulfur production in metric tons. A small but persistent volcanic-arc industry; the series ends in 1975 when domestic production was displaced by petroleum-derived sulfur.

Note: sparse observations.

Sources: Oficina Central de Estadística, Dirección General de Estadística e Instituto Nacional de Estadísticas, Anuario Estadístico de Chile (sección Minería), and Sociedad Nacional de Minería, Estadística Minera de Chile, various years.

Copper production value

ID: copper_production_value_nat · Unit: gold pesos (18d)

Coverage: National: 1918-1923 (6 years, 6 obs.)

Value of copper production, 1918-1923, in gold pesos of 18 pence.

Sources: *Dirección General de Estadística*. 1927. *Sinopsis Estadística de Chile, 1924-1927*. Santiago.

Sectoral Employment

Agricultural workers (national)

ID: `agricultural_workers` · Unit: persons

Coverage: National: 1810-1990 (181 years, 181 obs.)

Persons employed in the agricultural sector (crops, livestock, forestry, fishing) at national scale. The agricultural workforce was the majority of the Chilean labor force through the late 19th century and declined to under 15% by 1990.

Unit note: Unit field currently blank; should read 'persons'.

Note: methodological break at the 1976 regionalization.

Sources: *Censos de Población de Chile (Oficina Central de Estadística, Dirección General de Estadística e Instituto Nacional de Estadísticas)*, various census years.

Construction Workers

ID: `construction_workers` · Unit: persons

Coverage: National: 1810-1990 (181 years, 181 obs.)

Persons employed in the construction sector at national scale.

Unit note: Unit field currently blank; should read 'persons'.

Note: methodological break at the 1976 regionalization.

Sources: *Censos de Población de Chile (Oficina Central de Estadística, Dirección General de Estadística e Instituto Nacional de Estadísticas)*, various census years.

Manufacturing Workers

ID: `manufacturing_workers` · Unit: persons

Coverage: National: 1810-1990 (181 years, 181 obs.)

Persons employed in the manufacturing sector at national scale. The manufacturing workforce grew under import-substitution industrialization (1930-1973) and contracted under post-1973 liberalization.

Unit note: Unit field currently blank; should read 'persons'.

Note: methodological break at the 1976 regionalization.

Sources: *Censos de Población de Chile (Oficina Central de Estadística, Dirección General de Estadística e Instituto Nacional de Estadísticas)*, various census years.

Mining Workers

ID: `mining_workers` · Unit: persons

Coverage: National: 1810-1990 (181 years, 181 obs.)

Persons employed in the mining sector at national scale. The series tracks the 19th-century silver and copper booms, the nitrate era peak (1900-1930), the post-1929 collapse, and the post-1971 Codelco era.

Unit note: Unit field currently blank; should read 'persons'.

Note: methodological break at the 1976 regionalization.

Sources: *Censos de Población de Chile (Oficina Central de Estadística, Dirección General de Estadística e Instituto Nacional de Estadísticas)*, various census years.

Service Workers

ID: `service_workers` · Unit: persons

Coverage: National: 1810-1990 (181 years, 181 obs.)

Persons employed in the services sector (commerce, transport, finance, government, personal services) at national scale. The dominant employment category by the late 20th century.

Unit note: Unit field currently blank; should read 'persons'.

Note: methodological break at the 1976 regionalization.

Sources: *Censos de Población de Chile (Oficina Central de Estadística, Dirección General de Estadística e Instituto Nacional de Estadísticas)*, various census years.

Total employment

ID: employment_total_nat · Unit: persons

Coverage: National: 1956-1978 (17 years, 17 obs.)

Total employment recorded in the quarterly labour surveys, averaged to an annual figure. Part of the mid-20th-century sectoral employment series.

Sources: Mamalakis, Markos. 1980. Historical Statistics of Chile, Volume 2: Demography and Labor Force. Westport, CT: Greenwood Press.

Governance

Departmental judge present

ID: `pres_has_juez` · Unit: 0/1 indicator

Coverage: Department: 1855-1908 (21 years, 348 obs.)

Binary indicator: 1 if the department had a Juez de Letras (the central-government-appointed departmental judicial officer) listed in the national budget, 0 otherwise. From the Presupuesto. Tracks the geographic reach of the Chilean judicial apparatus, which lagged the administrative apparatus in southern and frontier departments.

Sources: Ministerio de Hacienda. Multiple years. Presupuesto de la Nación, República de Chile. Santiago.

Departmental governor present

ID: `pres_has_gobernador` · Unit: 0/1 indicator

Coverage: Department: 1855-1908 (20 years, 337 obs.)

Binary indicator: 1 if the department had a Gobernador (the central-government-appointed departmental executive under the 1833 constitution) listed in the national budget, 0 otherwise. From the Presupuesto de la República de Chile. Tracks the geographic reach of the central-government administrative apparatus.

Sources: Ministerio de Hacienda. Multiple years. Presupuesto de la Nación, República de Chile. Santiago.

Civil registry office present

ID: `pres_has_reg_civil` · Unit: 0/1 indicator

Coverage: Department: 1885-1907 (3 years, 156 obs.)

Binary indicator: 1 if the department had a civil registry office (Oficina del Registro Civil) in the given year, 0 otherwise. Civil registration was created by the 1884 Ley de Registro Civil and rolled out over the following decade; the series captures the geographic diffusion of the modern Chilean state.

Sources: Véjares, Maximiliano. Forthcoming. Department-level historical dataset, Chile, 19th century. Compiled from primary archival sources. Net Zero Industrial Policy Lab, Johns Hopkins University.

Industry

Manufacturing production index

ID: manufacturing_production_index · Unit: index, base = 100

Coverage: National: 1860-1990 (131 years, 131 obs.)

Index of manufacturing production. The base year and weighting scheme should be verified against the source documentation; the series provides relative magnitudes useful for growth comparisons but absolute interpretation requires the base specification.

Sources: Dirección General de Estadística e Instituto Nacional de Estadísticas and Sociedad de Fomento Fabril (SOFOFA), índice de producción industrial, various years.

Natural gas consumption

ID: natural_gas_consumption · Unit: millions of cubic meters

Coverage: National: 1860-1990 (110 years, 110 obs.)

Annual natural gas consumption in millions of cubic meters. Pre-1960 figures are essentially zero; the series captures the development of Chilean natural gas use from the southern Magallanes fields and from Argentine pipeline imports.

State capacity

Public administration spending (1935)

ID: pubadm · Unit: pesos

Coverage: Comuna: 1935 (1 year, 271 obs.)

Spending on public administration by comuna, in nominal pesos, for 1935, from the curated research assembly regime-state 1935.xlsx, the author's compilation of official mid-1930s comuna statistics. The assembly carries no page-level citation, so the series documents a compilation rather than a direct extraction. A proxy for the local presence of the state. A single-year cross-section.

Unit note: The assembly codebook carries no unit statement; nominal pesos inferred from magnitudes consistent with the municipal budget columns.

Sources: Véjares, Maximiliano. *Forthcoming. Compiled state-capacity dataset, Chile, 1935. Net Zero Industrial Policy Lab, Johns Hopkins University.*

Police personnel (1920)

ID: police1920 · Unit: count

Coverage: Comuna: 1935 (1 year, 132 obs.)

Police personnel stationed in the comuna in 1920, keyed to the 1935 commune frame, from the curated research assembly regime-state 1935.xlsx, the author's compilation of official mid-1930s comuna statistics. The assembly carries no page-level citation, so the series documents a compilation rather than a direct extraction. Only 133 comunas carry a value; missing comunas are absent from the source, not zeros. A single-year cross-section.

Sources: Véjares, Maximiliano. *Forthcoming. Compiled state-capacity dataset, Chile, 1935. Net Zero Industrial Policy Lab, Johns Hopkins University.*

Agrarian structure

Inquilinaje (resident-tenant labour share, 1935)

ID: inquilinaje · Unit: %

Coverage: Comuna: 1935 (1 year, 210 obs.)

Share of resident tenant labor (inquilinos) in the comuna, recorded as a proportion (values range 0 to 0.14), for 1935, from the curated research assembly regime-state 1935.xlsx, the author's compilation of official mid-1930s comuna statistics. The assembly carries no page-level citation, so the series documents a compilation rather than a direct extraction. Inquilinaje was the labor institution of the manorial estate system of the Central Valley. A single-year cross-section.

Sources: Véjares, Maximiliano. Forthcoming. Compiled state-capacity dataset, Chile, 1935. Net Zero Industrial Policy Lab, Johns Hopkins University.
